FIRST DAY'S SALE.

CITIES OF SPAIN, IN COPPER.

LOT

1 Spain; *see Mionnet*, vol. i. page 1, No. 4. *size* 5.

*** These coins, although inscribed HISPANORVM, are now considered to have been struck by a Spanish colony at Panormus in Sicily. Sestini (*Medaglie Ispane, pp.* 1 *and* 2) acutely remarks, that Florez gives none of these coins, except those which he copied from Paruta, and infers from this fact, and the inscription PANORMOS. SIC. on some, that they were struck in Sicily, where they are found.

Carteia, in Baetica; *Mt.* page 9, No. 54 *size* 5.

Gades; *Mionnet Supp.* vol. i. p. 26, No. 149. B[AL]BVS. [PO]NT., *very rare, and in good condition:* *size* 11. 3

CITIES OF SPAIN, IN SILVER.

2 Emporiæ, Tarraconensis; *Mt. Supp.* vol. i, p. 82, No. 471; but no dolphin under the winged horse; *fine condition, and fine work:* . *size* $4\frac{1}{2}$. *weight* $73\frac{8}{10}$ *grs.* 1

*** It will be perceived, on minute examination of the head of the winged horse, that there is a small naked genius clinging to it, and nearly covering it. The ear of the horse might appear to be so adjusted as to form a wing to the genius. For a more detailed account of this unique representation in antiquity, see an interesting paper by the Duke De Luynes, in the Revûe Numismatique for 1840, p. 85, noticed in the Numismatic Chronicle, vol. 3, p. 62. On this coin, however,

which is of *fine work*, the eye and the nostril of the horse are visible between the limbs of the genius, proving that the genius is clinging to the head, rather than forming, or constituting, the head of the animal. On the other hand, it must be admitted, that on the generality of these coins the little genius does certainly appear to form, or constitute, the horse's head, especially on all those of copper. The fact therefore seems to be, that the style of work of the bulk of these coins being that which is technically called *barbarous*, or approaching to that style, the opportunity of seeing a coin of *fine work* is so rare, that the latter opinion seems to prevail among numismatists.

3 Another; having a Dolphin under the winged horse, and also the little naked genius on the head of the animal; *in good condition:* . . *size* $4\frac{1}{2}$.

Two uncertain coins of Spain: *sizes* $3\frac{1}{2}$ *and* 2.

CITIES OF GAUL, IN COPPER.

Nemausus, Augustus and Agrippa; *Mt.* p. 77, No. 189; *three coins with slight differences, in very fine condition: size* 7. 8

CITIES OF GAUL, IN SILVER.

4 Massilia, in Gallia Narbonensis; *Mt.* p. 67, No. 28; *fine: size* $4\frac{1}{2}$, *wt.* $58\frac{2}{10}$ *grs.*

Massilia; *Mt.* p. 68, No. 47; *fine condition: size* $3\frac{1}{2}$. *wt.* $44\frac{2}{10}$ *grs.*

Another; of different style, *fine: size* $3\frac{1}{2}$. *wt.* $33\frac{6}{10}$ *grs.* 3

CITIES OF ITALY, IN SILVER.

5 Populonia, in Etruria; *Mt.* p. 101, No. 46; *in fine condition, and very rare; not in the French collection: size* 4. *wt.* $66\frac{1}{10}$ *grs.*

Cales, in Campania; *Mt.* p. 111, No. 108; but with a Branch, instead of the point of a spear, and no letter; *rare, and in very fair preservation: size* $5\frac{1}{2}$. *wt.* $106\frac{8}{10}$ *grs.* 2

6 Cumæ, in Campania; *Mt.* p. 114, No. 141, *very fair condition: size* 5.

Cumæ; *Mt. Supp.* p. 238, No. 268, *and Combe Num. Vet. in Mus. Brit.* tab. 3, fig. 1; *of extreme rarity and in fine condition:* . . *size* 2.

Neapolis; *Mt.* p. 117, No. 162; *fine: size* 5. *wt.* 116 *grs.* 3

7 Neapolis; with APTE. under the neck; *Mt.* page 116, No. 154; *very rare, and extremely fine:* *size* $4\frac{1}{2}$. *wt.* 111 *grs.* 1

8 Neapolis; *obv.* Female Head to the left, a vase with one handle behind; *rev.* Bull with a human face, walking to the right, underneath BI, above is a winged Victory, with a wreath; *extremely fine:* *size* 5. *weight* $114\frac{9}{10}$ *grs.* 1

9 Neapolis; *Mt.* p. 115, No. 147; *rare, and well preserved:* *size* 5. *wt.* $112\frac{9}{10}$ *grs.*

Neapolis; *Mt.* p. 116, No. 158, but ΘE under the bull: *size* $4\frac{1}{2}$.

Neapolis; with Head to the left, and parazonium behind; *rev.* A under the bull: *size* $4\frac{1}{2}$. 3

10 Nola, in Campania; *Mt.* p. 122, No. 239, but with the legend correct, ΝΩΛΑΙΩΝ; *rare, and in perfect preservation:* *size* $5\frac{1}{2}$. *wt.* 113 *grs.* 1

11 Nuceria-Alfaterna, in Campania; *Mt.* p. 123, No. 242; *see Millingen's Recueil, &c.* pl. 1, fig. 7; *very rare, and well preserved:* *size* 5. *wt.* $110\frac{5}{10}$ *grs.* 1

*** The opinion of the learned Avellino, that this remarkable head with the ram's horn, represents the hero Epidius Nuncionus, does not appear tenable. It is probably that of the river Sarno personified.

12 Another; *from the same die, equally well preserved, but the legend not so entire:* *size* 5. *wt.* $111\frac{9}{10}$ *grs.*

Suessa, in Campania; *Mt.* p. 124, No. 252, but with an ear of wheat behind the head; *rare, and in very fine condition:* *size* 6. *wt.* $113\frac{4}{10}$ *grs.* 2

13 Teanum, in Campania; *Mt.* p. 125, No. 262, but the Oscan legend is not as given in *Mt.* pl. 19, No. 13; it is clearly on this coin TIANVR. in Oscan letters, retrograde; *see Dumersan Coll. Allier*, pl. 1, fig. 8; *of extreme rarity, and in very good condition:* *size* $5\frac{1}{2}$. *wt.* $111\frac{2}{10}$ *grs.* 1

*** The reverse of this coin appears to give an unquestionable example of a car drawn by *three* horses, or triga; a very rare representation on ancient monuments.

14 Another; *but dubious*

Campania, (uncertain town); ROMA., *Mt.* p. 128, No. 292 *size* $4\frac{1}{2}$.

Campania, (uncertain town); ROMANO, *Mt.* p. 127, No. 281; *well preserved, and rare:* *size* 5. *wt.* $103\frac{3}{10}$ *grs.*

Hyrium, in Apulia; usual type, three different: *size* 5. 6

15 Campania, (uncertain town); *obv.* ROMANO, laurel'd Head of Apollo, to the left; *rev.* Horse galloping to the right, above is a star of 16 points: . *size* 5.

Campania, (uncertain town); ROMANO, *Mionnet,* p. 127, No. 278, but, a Bunch of Grapes behind the head: *size* 4.

Hyrium, in Apulia; *Mt.* p. 132, No. 320, *very rare type*: *size* 5.

Hyrium, in Apulia; usual type: . *size* 5. 4

16 Hyrium, in Apulia; *Mt.* p. 132, No. 516; *rare, and well preserved:* . . *size* 6. *wt.* $97\frac{4}{10}$ *grs.*

*** The lightness of this coin is probably occasioned by its being an ancient forgery. Its specific gravity would prove this.

Campania, (uncertain town); *obv.* laurel'd Head of Apollo, to the right; *rev.* ROMA, Horse galloping to the left; *fine: size* 5. *wt.* $101\frac{8}{10}$. *grs.* 2

17 Campania; *obv.* Female Head to the right, with diadem, earrings, and necklace; under the neck is APTEMI, behind is a small Ceres, seen in front, with a torch in each hand; *rev.* Head and neck of a Horse to the right, with bridle and peculiar head trappings, on a base, on which are the letters ROMANO.; behind, is an ear of wheat; *false: size* 6. *wt.* $155\frac{6}{10}$ *grs.*

*** It is painful to see a false coin so well executed as this, and contrived with so much numismatic knowledge. It not only presents us with the type of a new Campanian town (Neapolis) in conjunction with the inscription ROMANO, as might be expected, but also is of a size, and carefully adjusted to a weight, which, though not hitherto known, might very fairly be presumed to exist. Compare the obverse with Mionnet, vol. i. p. 116, No. 155, and the reverse with p. 127, No. 282.

Campania; Uncertain gold coin, purporting to be of this neighbourhood; *obv.* Head of Bacchus to the right, with wreath of ivy, and berries in front of the head; *rev.* a Cista, partly covered with a goatskin, against which is placed a thyrsus with tæniæ; in the exergue, a Samnite inscription; *false: size* 5. *wt.* $131\frac{1}{10}$ *grs.* 2

*** This is the identical coin published by Dominicis, *Repertorio Numismatico,* vol. 2, p. 417; and was formerly in the collection of the late Dr. Nott. The falsifier seems to have, in part, copied the type of a silver denarius of the Vibia family, see *Morell.*

18 Campania, (uncertain town); *obv.* helmeted Head of Mars, to the right; *rev.* Head and neck of a Horse, to the right, with bridle and head trappings; underneath, ROMA., and behind, a strigil or falx; *very good condition: size* $3\frac{1}{2}$. *wt.* $50\frac{6}{10}$ *grs.*

Another; *Mionnet*, p. 128, No. 291; *very fine: size* $4\frac{1}{2}$. *weight* 101 *grains.*

Another; *Mt.* p. 128, 291: . *size* $4\frac{1}{2}$.

Hyrium, in Apulia; *Mt.* p. 131, No. 314: *size* $5\frac{1}{2}$. 4

GOLD COINS OF TARENTUM.

19 Tarentum; *obv.* TAPANTINΩN. Head of Venus to the right, with tiara in front, ear-rings, and necklace, the hair flowing behind the neck; *rev.* TAPAΣ. Taras on a Dolphin, to the left, his right hand extended, and his left holding a trident; underneath ⊦H.; *extremely rare, fine condition, and very beautiful work:* . *size* $2\frac{1}{2}$. *wt.* $66\frac{4}{10}$ *grs.* 1

20 Tarentum; *obv.* helmeted Head of Minerva to the right, with long hair, and a serpent on the helmet; *rev.* Taras in a biga, to the right, holding a trident; above is a star, and under the horses, a dolphin; *fine work and condition, and very rare: size* $2\frac{1}{2}$. *wt.* $44\frac{3}{10}$ *grs.* 1

21 Another, *in very fair condition: size* 2. *wt.* $43\frac{6}{10}$ *grs.* 1

22 Tarentum; *obv.* Head of Apollo, with laurel wreath and long hair, to the right; N. K. in a monogram before it; *rev.* TAPANTIΝΩN. Eagle with wings extended, standing on a thunderbolt, to the right; in the field, the head of a spear, and AP. in a monogram: underneath the thunderbolt ⊐A.; *extremely rare, and very fine work and condition: size* 2. *wt.* 33 *grs.* 1

23 Tarentum; *obv.* Head of Hercules to the right, covered with the lion's skin; *rev.* TAPAΣ. Taras seated on a Dolphin, to the left, holding in his right hand a diota, and in his left a trident; *very good work and condition, and very rare: size* 1. *wt.* $13\frac{2}{10}$ *grs.* 1

24 Tarentum, in Calabria; *obv.* TARAΣ. *retrograde*, Taras on a Dolphin, to the right, with his arms extended; in archaic style; *rev.* TARAΣ. *retrograde*, winged Sea Horse to the left, and a scallop shell underneath, *rare, and in very good condition:* . *size* 6. *wt.* $120\frac{5}{10}$. *grs.* 1

25 Another; *fair condition: size* 5. *wt.* $123\frac{1}{10}$ *grs.*

Tarentum; *Mt.* p. 138, No. 373: *size* 3. *wt.* $49\frac{5}{10}$ *grs.*

Tarentum; *obv.* TARAΣ. *retrograde*, Taras, *in archaic style*, on a Dolphin, to the left: a scallop shell underneath; *rev.* a Wheel; *compare with Dumersan, Cab. Allier*, pl. 1, fig. 9; *extremely rare type, and very good condition:*
size 4. *weight* $123\frac{6}{10}$ *grains* 3

26 Tarentum; *obv.* Female Head to the right, in archaic style, the hair bound with a diadem; *rev.* TARAΣ.; half a winged Sea Horse to the left, and scallop shell underneath; *compare Mionnet Supp.* page 280, No. 558; *very rare type, and good condition:* . *size* 3. *wt.* $58\frac{8}{10}$ *grs.*

*** This reverse affords an example of the type being made to have a secondary meaning, as it is evidently *indicative of the value of the coin.* It will be observed that this coin is half the weight of lot 24; and that it has only *half the type* on the reverse—namely, *half the winged sea horse.* See a paper in the Numismatic Journal, vol. i. p. 116, Note 70.

Tarentum; *obv.* Female Head to the right; *rev.* Scallop Shell; *see Combe Brit. Mus.* tab. 3, fig. 11; *very good condition:*

28 Tarentum; *obv.* Horseman to the left, with spear and buckler, in a singular and elegant position on his horse; underneath, Ⱶ; *rev.* TAPAΣ.; Taras on a Dolphin, to the left, looking at a helmet, in his right hand; indication of the waves of the sea underneath; *extremely fine work, and good condition:*

30 Tarentum, four different, usual types: . *size* 5.

Buxentum and Pyxus, in Lucania; *Mt.* p. 151, No. 490; *false:*

HERACLEA, IN GOLD.

31 Heraclea; *obv.* Head of Apollo to the left, with laurel wreath, and long hair; in front, ΣA. *** See Mionnet, vol. i. p. 152, No. 492, and Supp. p. 295, No. 636 This coin, however, no doubt belongs to Tarentum, where Mionnet has himself also placed it. See Supp. p. 278, No. 542. See also Eckhel. Num. Vet. Anecdoti, tab. 3, fig. 11; and afterwards Millingen, Rec. de Méd. Grecques inéd., pl. 1, No. 12. Combe, Vet. Num. in Mus. Brit., p. 37, follows Eckhel, and gives the coin to Heraclea, probably because he had not seen Millingen's work.

120 Thurium; Tetradrachm, and Didrachm, usual type, but on the *rev.* of the Didrachm is ΣΩ. above the Bull tossing, and a Dolphin, to the right, in the exergue; *rare:*

size 6, *and size* 5. 2

121 Thurium; Tetradrachm, and Didrachm, usual type, but the Head of Minerva on the Tetradrachm is to the left, and under the Bull tossing are six pellets placed in a line; *fair condition, and fine work.* On the reverse of the Didrachm, the Bull tossing has a K. on the hinder part; *fine work:*

size 6, *and size* 5. 2

122 Thurium; Tetradrachm, and Didrachm, usual type. On the Tetradrachm, the Head of Minerva is to the right, and under the tossing bull is the letter Η. and AP. in a monogram:

size 6.

On the Didrachm, the Head of Minerva is to the right, and the helmet ornamented with a wreath of olive; above the shoulder of the Bull tossing is E.; *fine old work, and very good preservation:* *size* $4\frac{1}{2}$. *weight* $122\frac{6}{10}$ *grs.* 2

123 Thurium; *obv.* helmeted Head of Minerva to the right, the helmet ornamented with a wreath of olive; *rev.* ΘΟΥΡΙΩΝ. Thurium; *obv.* as above, but A. in the field in front of the helmet; *rev.* ΘΟVPI. Bull to the left, walking and butting; in the exergue, a fish; *old work and well preserved:* *size* 2. *weight* $18\frac{6}{10}$ *grs.* 2

125 Another; rather more recent style, the Bull in the tossing attitude; *very fine work and preservation:* *size* 5. *weight* 123 *grs.*

Another; but the helmet ornamented with a wreath of olive, and on the *rev.* E. under the tossing bull; *very good work and condition:* *size* 5. *weight* $123\frac{8}{10}$ *grs.* 2

*** It is very rare to find a coin which like this unites the older type of the obverse, with *the bull in the attitude of tossing* on the reverse. It is usual, with this obverse, to find the bull walking, with the head merely inclined downwards, butting, seen in profile, and in an older style of work. This coin seems to indicate the period of transition from the older style to the more recent.

126 Another; same type as lot 125, and *very well preserved:* *size* 5. *weight* $123\frac{7}{10}$ *grs.*

Another; the helmet having a wreath of olive, with Φ in front of it; but the reverse having the Bull, to the left, walking and butting, in old style, as usual; under the bull, a very minute and beautiful representation of a dove; *well preserved, and fine old work:* . *size* 5.

Another; but the Bull to the left, standing and butting: *size* 2. 3

*** The gradual change in the attitude of the bull (the well known symbol of a river on coins) from the quiet position of the animal, with his head turned back, on the primitive coins of Sybaris, down to its violent attitude on the latest coins of Thurium, is very remarkable; and presents an interesting subject of inquiry.

128 Velia, in Lucania; *obv.* Female Head with necklace, in old style, to the right, the hair turned up behind and tied; *rev.* ΥΕΛΗΤΕΩΝ (sic.) in the exergue; a Lion running to the right; above is an owl flying; compare *Mionnet, Supp.* page 325, No. 880; *extremely rare type, and very well preserved: size* 5. *weight* $117\frac{9}{10}$ *grs.* 1

size 8. *weight* $122\frac{2}{10}$ *grs.* 1

147 Another; *Mt. Supp.* p. 338, No. 974; *very good condition:*
size 8. *weight* $125\frac{3}{10}$ *grs.* 1

149 Another; *Mt.* p. 340, No. 988; *the head side in still finer condition than that of the preceding coin, and of most beautiful workmanship; on the reverse, the head of Hercules is not visible, nor the latter part of the inscription; but otherwise the coin is most beautiful and perfect, except a small hole, which fortunately has not done great injury:*
size $5\frac{1}{2}$. *weight* $120\frac{7}{10}$ *grs.* 1

150 Crotona; *Mt.* p. 191, No. 870; but the inscription is KPOTO., and on the head ornament are alternate winged half griffins and flowers; *this most rare and admirable coin is in a perfect state of preservation, both on the obverse and reverse:*

154 Another; of the same style of work as lot 152, *but not so exquisitely preserved, although a very fine coin:* *size* 5. 1

155 Crotona; *obv.* BOI. an Eagle with both its wings raised, standing, to the right, on a branch of laurel; *rev.* ♀POTΩN. (sic.)

*** Mionnet omits to notice the curious and rare circumstance, that on these coins the eagle is standing on part of a Doric architrave.

156 Another; *also very well preserved:* *size* 5.

Crotona; *Mionnet*, pl. 65, fig. 6; *a most beautiful coin in very perfect condition:* *size* 5. *weight* $116\frac{4}{10}$ *grs.* 2

158 Locri; *Mt.* page 195, No. 914; *obv.* Head of Jupiter bearded and laurel'd, to the right, under the neck ΠΕVΣ.; *rev.* ΕΙΡΗΝΗ. ΛΟΚΡΩΝ., Female figure holding a caduceus in her extended right hand, seated on a square altar, on which is sculptured a bucranium; *good condition, and of extreme rarity:* *size* $5\frac{1}{2}$. *weight* $110\frac{6}{10}$ *grs.* 1

*** The fabric of this coin is peculiar, and the workmanship coarse.

160 Locri; *obv.* ΛΟΚΡΩΝ. helmeted Head of Minerva to the right; *rev.* Pegasus to the left; *in a state of perfect preservation:* *size* 5. *weight* $133\frac{4}{10}$ *grs.*

Another; but no inscription on the obverse, and ΛΟ. under the pegasus; *in perfect preservation:*
size 5. *weight* $133\frac{2}{10}$ *grs.* 2

161 Rhegium; *Mt.* page 200, No. 955, but the legend of No. 954; the figure is seated and bearded; *excessively rare, and in very fine condition:* *size* $6\frac{1}{2}$. *weight* $265\frac{2}{10}$ *grs.* 1

*** This coin is like fig. 27, tab. 3, Combe Num. Vet. in Mus. Brit., except that this coin has a laurel leaf in the exergue under the car.

162 Rhegium; *Mionnet*, pl. 65, fig. 7, exactly; *exceedingly difficult to meet with in such very fine condition:*
size 8. *weight* $262\frac{9}{10}$ *grs.* l

163 Another; but the style of the lion's head is quite different, as well as the attitude of the figure on the reverse; the inscription is RECINOS.; *well preserved and rare:* *size* 7. l

164 Rhegium; *obv.* [PH]ΓINOΣ. Head of Apollo to the left, with a broad wreath of laurel formed of three rows of leaves, and long hair; the legend runs in front of the head; *rev.* full faced Head of a Lion; *in the most perfect state of preservation, and of the finest workmanship:*
size 6. *weight* $261\frac{8}{10}$ *grs.* l

*** This beautiful coin is probably unique.

165 Rhegium; PHΓINON. *Mionnet*, p. 200, No. 952; *extremely rare with this inscription; beautiful work, and in the most perfect preservation:* *size* 6. *weight* $268\frac{3}{10}$ *grs.* l

166 Rhegium; PHΓINOΣ. *obv.* Head of Apollo to the right, crowned with laurel? (serrated leaves), the hair turned up behind like that of a female; behind the head are two laurel leaves, and in front of the neck is the artist's name, IIIIOKPATHΣ, in very minute letters, disposed thus $\frac{\text{KPATH}}{\text{OIIIIΣ}}$; *rev.* full faced Head of a Lion; compare *Magnan. Brutt.* tab. 23, fig. 2; *very rare, and in perfect preservation:*
size 6. *weight* $267\frac{8}{10}$ *grs.* l

*** It is very remarkable that Mionnet gives no description of a Tetradrachm of Rhegium of this type, inscribed PHΓINOΣ.

On this coin, and the four following, the wreath on the androgynous head of Apollo is formed of *serrated* leaves, not laurel? See the note to lot 262, page 39.

167 Another; precisely similar, except that the artist's name, IIIIOKPATHΣ, is disposed thus $\frac{\text{OIIIIΣ}}{\text{KPATH}}$; *in very fair condition, and extremely rare:* *size* 6. *weight* $265\frac{2}{10}$ *grs.* l

168 Another; without artist's name, compare *Magnan. Brutt.* tab. 23, fig. 2; *very rare, and in fine condition:*
size $5\frac{1}{2}$. *weight* $266\frac{8}{10}$ *grs.* l

169 Another; different character of face; *very rare, and in fine condition:* *size* 6. *weight* 258 *grs.* l

170 Another; *in excellent preservation, and very rare:*
size $5\frac{1}{2}$. *weight* $264\frac{7}{10}$ *grs.* l

*** The rarity of these coins seems contradicted by their number; but, as before said, there is no mention of this type and size in Mionnet.

with PHΓINOΣ, and *in the Hunter Collection there is not one.* In Combe Vet. Num. in Mus. Brit. there is only mention of *one.*

It may be here hinted to the young Collector, that his notions of rarity must not be drawn from the coins forming this princely collection: it being its peculiar characteristic, that it will often be found to possess the most rare coins in the greatest variety and abundance, to the utter exclusion, with few exceptions, of common coins, except they have the merit (in itself so rare) of extraordinary beauty of workmanship, or superlative preservation.

It should, moreover, be kept in mind, that this Collection is the result of *nearly fifty years'* unwearied devotion to the acquisition of the most rare coins, which, during that long period, have been offered for public sale in London.

171 Rhegium; *compare Dumersan*, pl. 1, fig. 15; but *see Hunter*, tab. 44, fig. 16; *very rare, fine old work, and in a perfect state of preservation: size* $3\frac{1}{2}$. *weight* $65\frac{9}{10}$ *grs.* 1

172 Another; *it requires a judicious cleaning: size* $3\frac{1}{2}$.

175 Terina; the type is similar to that engraved plate 2, fig. 3, of *Millingen's Ancient Coins of Greek Cities and Kings; rare, and a most exquisite and perfect coin in every respect: size* $5\frac{1}{2}$. *weight* $120\frac{3}{10}$ *grs.* 1

*** It is remarkable that the obverse of this coin is from the same dye as the obverse of lot 173, but the reverses are different.

*** It will be perceived that the stars on these coins of Capua, indicate value; the former being double the value of the latter. The stars are, therefore, to be considered as quite independent of the type of the coin, like the pellets on the parts of the As.

Venusia ; *Mionnet, Supp.* page 270, No. 491, *(Uncia); extremely rare, and not in the French collection: size* 4.

*** These coins may belong rather to Veretum, a city of the Salentines, in Japygia, on account of their resemblance to the coins of Uxentum, a town only fifteen miles distant from Veretum : as suggested by *Millingen*, page 15, *Sylloge of Unedited Coins of Greek Cities, &c.* 4to., *London*, 1837 ; and also at page 241 of his *Considerations sur la Numismatique de l'Ancienne Italie*, 8vo., *Florence*, 1841, a work which cannot be too highly appreciated, as a most valuable and sound critical inquiry into the classification of the coins of Italy.

CITIES OF SICILY, IN SILVER.

*** Among the various rare and beautiful coins of Sicily in this princely Collection, are many which possess peculiarities of type, of which the rarity cannot be positively determined, for want of time for reference. Hence, many peculiarities specified as *rare*, or *very rare*, may be found to be, in fact, *unique*.

248 Abacænum; *Hunter*, tab. 1, fig. 4, *Mionnet*, p. 357, No. 4; *extremely rare, and well preserved:*

size 2. *weight* $12\frac{4}{10}$ *grs.*

GOLD COIN OF AGRIGENTUM.

Agrigentum; *Mionnet, Supp.* page 360, No. 17, and *Torremuzza*, tab. 4, fig. 1; *perfect condition (false):*

size 3. *weight* $38\frac{1}{10}$ *grs.* 2

*** There is no doubt that this coin is false. The weight is wrong, and the style of the work and of the design afford further proof against it. It is one of the oldest fabrications extant; a gold coin, evidently from the same die, having been first published by *Goltzius* in 1576, and by *Paruta* in 1612.

CITIES OF SICILY, IN SILVER. *(Continued.)*

249 Agrigentum; compare *Mt.* p. 213, No. 40, and *Mt.* vol. 7, pl. 67, fig. 1; *obv.* two Eagles, to the right, devouring a hare; in the field, a lion's head in profile, to the left; *rev.* AKPAΓANTINON. (boustrophedon) on a tablet suspended over a quadriga at full speed to the left, driven by a winged Victory; in the exergue, the staff of a thyrsus; see *Torremuzza*, tab. 4, fig. 12. *This magnificent coin is in most perfect preservation, and of extraordinary rarity:*

size 8. *weight* $268\frac{6}{10}$ *grs.* 1

250 Agrigentum; *obv.* [AKRA]ΓANTINΩ[N], *retrograde*, two Eagles, to the right, devouring a hare; *rev.* a Quadriga at full speed, to the right, driven by a female; above is a floating winged Victory, about to crown the female charioteer with a wreath; in the exergue, a crab. *This extremely rare and beautiful coin is in extremely good preservation; it is not in Mionnet, Hunter, or Torremuzza, and is probably unpublished and unique:* *size* $7\frac{1}{2}$. *weight* $271\frac{5}{10}$ *grs.* 1

251 Agrigentum; *Mionnet*, page 212, No. 27, pl. 62, fig. 1; but on the reverse is a dolphin under the crab; *rare, and in very good condition:* *size* 7.

252 Agrigentum; *Mionnet*, p. 211, No. 18; *fine:* *size* $4\frac{1}{2}$.
Agrigentum; *Mt. Supp.* p. 360, No. 20, and *Hunter*, tab. 2, fig. 7; *fine:* *size* 2. *weight* $13\frac{4}{10}$ *grs.* 2

253 Agrigentum; two coins exactly similar to the last lot: 2

254 Agrigentum; *obv.* AKRA. Eagle to the right, standing on something globular; *rev.* Crab, A. underneath; *perfect condition:* *size* $4\frac{1}{2}$. *weight* $133\frac{8}{10}$ *grs.* 1

255 Agrigentum; *Mt.* p. 213, No. 43; but Γ. in the field, instead of B. *(query a date); as it came from the die, and a most rare coin:* *size* $4\frac{1}{2}$. *weight* $50\frac{2}{10}$ *grs.* 1

256 Camarina; *Mt.* pl. 222, No. 119; *Torremuzza*, tab. 18, fig. 1; *obv.* ΙΠΠΑΡΙΣ. retrograde; *rev.* KAMAPINAION.; *this most elegant and well preserved coin is of the greatest rarity:* *size* $6\frac{1}{2}$. *weight* $133\frac{1}{10}$ *grs.* 1

257 Camarina; *Mt. Supp.* p. 375, No. 125; *Torremuzza*, tab. 17, fig. 5; but on this coin there is the unpublished? peculiarity of the name, ΕΞΑΚΕΣΤΙΔΑΣ. in very minute letters, on the band above the two vases, forming the exergue of the coin; *very beautiful work, very good condition, and of extreme rarity:* *size* 7. *weight* $264\frac{6}{10}$ *grs.* 1

*** Mionnet describes the charioteer as *Guerrier casqué*, but it is a female wearing a helmet, (Minerva,) as proved by the smaller coins.

258 Another; from the same die, both on obverse and reverse, but *not quite in such good state as the preceding, and the female charioteer rather blurred, but still a very fine coin:* *size* 7. *weight* 264 *grs.* 1

259 Another; *Mionnet*, p. 223, No. 121, and *Hunter*, *tab.* 14, fig. 7; but the inscription not retrograde, and with the same female charioteer wearing a helmet, not an old male figure, as engraved: see *Torremuzza*, tab. 17, fig. 2; *very rare, and very fair preservation:* *size* 7. *weight* $267\frac{3}{10}$ *grs.* 1

*** The head of Hercules on this coin is in older style than on the preceding, and bearded.

260 Camarina; *Mt.* p. 222, No. 112; *Torremuzza*, pl. 18, fig. 8; *fine:* *size* 2. *weight* 12 *grs.*
Catana; *Mt.* p. 226, No. 154; *Torremuzza*, pl. 21, fig. 15; *very fine:* *size* 2. *weight* $11\frac{9}{10}$ *grs.* 2

261 Camarina; same as in the preceding lot.
Catana; *obv.* Head of Silenus to the left; *rev.* KA. Thunderbolt and two bucklers; *this minute coin is in a perfect state*

of preservation, and presumed to be unique, and unpublished: . *size* $\frac{1}{4}$. *weight* $2\frac{4}{10}$ *grs.* 2

262 Catana; *Mionnet, Supp.* p. 378, No. 149; *Hunter*, tab. 15, fig. 21; *Torremuzza, auctarium* I. tab. 3, fig. 1; *obv.* Androgynous Head of Apollo, full faced, crowned with a wreath formed of *serrated* leaves, (not laurel?) and his hair falling down on each side like that of a female; in the field to the left is a bow, and the word ΧΟΙΡΙΩΝ. in minute letters, probably the name of the artist; to the right is a lyre of peculiar form, partially hidden by the hair; under the neck, in minute letters, ΑΠΟΛΛΩΝ.; *rev.* in the exergue ΚΑΤΑΝΑΙΩΝ.; a Quadriga at full speed to the right, driven by a female; above is a floating winged female, about to crown the charioteer; in the field is a fluted Ionic column; in the exergue, a shrimp; *fine work, of the utmost rarity, and in very excellent condition:* *size* $7\frac{1}{2}$. *wt.* $264\frac{5}{10}$ *grs.* 1

*** This coin, by its superior condition, corrects the reading of Combe ΧΟΙΚΕΩΝ. His description of the head of Apollo as *caput muliebre* has been already corrected by Torremuzza, (Auct. ad. sic. Numism. p. 8.) and by Eckhel, who merely give the coin on Combe's authority. If on that in the Hunter Cabinet there really be no lyre in the field, to the right of the head of Apollo, this coin, in that curious particular, is probably unique, as well as the specimen in the Hunter Collection.

The androgynous Apollo, above described, recurs often on the tetradrachms of Rhegium, (*see note to lot* 166, *p.* 25) on some of which, as on this coin, the leaves ornamenting the head of the god are also *serrated* like the arbutus. This has led Combe to describe the head as *coronâ querceâ ornatis*. See *Hunter*, page 87, No. 1.

263 Catana; *Mionnet*, p. 226, No. 150; *Hunter*, tab. 15, fig. 22; *Torremuzza*, tab. 20, fig. 1; *a very fine coin, in the highest state of preservation, and of extreme rarity:*

size 7. *weight* $267\frac{3}{10}$ *grs.* 1

*** Combe reads the artist's name ΗΡΑΚΛΕΙΑΝ; Torremuzza, as well as Mionnet, read ΗΡΑΚΛΕΙΔΑΣ. The latter is probably the true reading. On this coin it certainly *appears* like ΗΡΑΚΛΕΙΑΝ, but the letters are rather blurred from slight fractures in the die. On this coin the leaves on the head of Apollo are not serrated.

264 Catana; *obv.* ΚΑ[ΤΑΝΑΙΟΣ.] Head of Apollo to the right, with laurel wreath in front, the hair adjusted behind like that of a female; behind the head is a fish; *rev.* Biga to the right, with a male charioteer holding a wand; above, a floating winged female figure is about to crown the horses; in the exergue is a small shrimp *(squilla fluviatilis)*; compare

Torremuzza, tab. 21, fig. 2; *exquisite old work, and very fine condition:* *size* 7. *weight* $266\frac{3}{10}$ *grs.* 1

265 Another; *obv.* KATANAIOΣ. but nothing behind the head; *a very fair coin, but inferior work and condition to the preceding:* . *size* 7. *weight* $268\frac{6}{10}$ *grs.* 1

266 Catana; *obv.* KATANAIoN. Head of Apollo to the left, the hair short and without any ornament, or laurel, but like that of a female; *rev.* a Quadriga, to the left, at full speed, a floating winged female figure above is about to crown the male charioteer; *extremely rare type, very fine work, and very good condition:* *size* 6. *weight* 264 *grs.* 1

267 Catana; *obv.* KATANAIΩN. Head of Apollo to the right, the hair short, but with a triple wreath of laurel in front; *rev.* in the exergue, KATANAIΩN. a Quadriga at full speed to the left, a floating winged female figure above is about to crown the male charioteer; *extremely rare type, very fine work, and very good condition:* *size* $6\frac{1}{2}$. *wt.* $263\frac{3}{10}$ *grs.* 1

268 Catana; *Mionnet*, p. 226, No. 155; but the head to the right: *size* $1\frac{1}{2}$.

Catana; *Mt. Supp.* p. 378, No. 150; *Hunter*, tab. 16, fig. 1; *rare, and in very fine preservation:* *size* 4. *wt.* $65\frac{8}{10}$ *grs.*

*** The fine preservation of this latter coin corrects Combe's accurate description. The artist had in fact omitted the second N in AMENANOΣ, and the final N in KATANAIΩN; but this coin shews that he rectified his mistakes as well as he could, by inserting the omitted letters.

Enna; *obv.* ΔAMATHP. Head of Ceres, ornamented with wreath of corn, to the right; *rev.* ENNAIΩN. Bull's head, seen nearly full face; above it, between the horns, is a grain of barley; and below it, a blade of bearded wheat; in the exergue, a torch: compare *Torremuzza*, tab. 28, fig. 7; *fine work, very good condition, and unpublished in silver; but not free from doubt as to its authenticity:*

size 5. *weight* $129\frac{9}{10}$ *grs.* 3

GOLD COINS OF GELAS.

269 Gelas; ΣΩΣIΠOAIΣ. *Mionnet, Supp.* p. 387, No. 196; *Torr.* tab. 31, fig. 1; *fine condition, and of extreme rarity:* *size* $1\frac{1}{2}$. *weight* $13\frac{1}{10}$ *grs.* 1

*** The other coin with ΣΩΣIΠOAIΣ, published by Torremuzza, auct. 2, tab. 2, fig. 1; Mionnet, Supp. p. 387, No. 197, occasions a suspicion as to the authenticity of this.

270 Gelas; *obv.* ΓΕΛΑΣ. the forepart of a Bull with a human face, to the left; underneath is a grain of barley; *rev.* Horseman to the right, holding a lance: compare *Mionnet*, p. 236, No. 226, and *Torremuzza*, tab. 31, fig. 2; *fine preservation, and of extreme rarity, but not of certain authenticity:*
size $2\frac{1}{2}$. *weight* $16\frac{7}{10}$ *grs.* 1

CITIES OF SICILY, IN SILVER. *(Continued.)*

271 Gelas; *Torremuzza*, auct. I, tab. 4, fig. 2; but the bull with the human face is to the right; see *Hunter*, tab. 28, fig. 6; *very fine condition:* *size* $8\frac{1}{2}$. *weight* $269\frac{6}{10}$ *grs.* 1

*** This coin shews in a very remarkable degree, on the edge, the peculiarity of the Sicilian style of minting.

272 Another; older style. ΓΕΛΑΣ (retrograde); *very fine:*
size 7. *weight* $262\frac{4}{10}$ *grs.* 1

273 Another; very similar, CΕΛΑΣ.; *very sharp and fine, particularly the reverse:* *size* 7. *weight* $267\frac{2}{10}$ *grs.* 1

274 Another; *Torremuzza*, tab. 31, fig. 12; *Hunter*, tab. 28, fig. 5; but with the long beard; *older style than either of the preceding, obverse and reverse well preserved:*
size 6. *weight* $270\frac{7}{10}$ *grs.*

Gelas; *Mionnet, Supp.* p. 389, No. 213; *Torremuzza*, tab. 31, fig. 4; *Hunter*, tab. 28, fig. 13; but the bearded head ornamented with corn; *of excessive rarity, but middling condition:* . *size* $1\frac{1}{2}$. 2

*** It was, no doubt, the bad condition of the coin in the Hunter Cabinet, which occasioned Combe to describe the bearded male head as *laureatum*. See the reverse of the beautiful brass coin of this town, lot 588.

275 Himera; *Mt.* p. 241, No. 267; *Torr.* tab. 35, fig. 5; but with a grain of barley in the field on the obverse; *of excessive rarity; obverse in very fair condition; reverse middling:*
size 7. *weight* 264 *grs.* 1

*** Combe, in describing the obverse of a coin very similar to this, tab. 30, fig. 18, says *aram igniferam*, and Mionnet also says, p. 241, No. 267, *autel allumé*, but on this coin it appears like a stela.

276 Himera; *obv.* V⌋ Cock to the right; *rev.* Four incuse triangles, and four in relief, forming a square; *Torr.* auct. I, tab. 4, fig. 2; compare *Mt.* pl. 39, fig. 10; *very fine condition, and rare:* . *size* 5. *weight* $88\frac{5}{10}$ *grs.*

Himera; with two letters on both sides, *Mionnet, Supp.* page

392, No. 230; *Torremuzza*, auct. 2, tab. 3, fig. 3; *rare, and in very fine condition:* *size* 5. *weight* $89\frac{1}{10}$ *grs.* 2

*** The remote antiquity of these early coins of Himera may be safely inferred, from their being among the few Sicilian coins which are adjusted to the *Æginetan Talent*, like those of Zancle. These two are *Drachmæ* of that talent. In each of the two following lots is a later coin, with a crab on the reverse, which probably may indicate an alliance between Himera and Agrigentum. These later coins, being *Didrachmæ of the Attic talent*, shew that some early and important political change had taken place, and occasioned an alteration in the public standard of the money of Himera. The Tetradrachm, lot 275, though an old coin, is also of the Attic standard.

277 Himera; with the letter V, *Mionnet*, p. 240, No. 259, and compare *Torremuzza*, auct. 2, tab. 3, fig. 3; *in very fair preservation:* *size* $4\frac{1}{2}$. *weight* $89\frac{6}{10}$ *grs.*

Himera; (*rev.* Crab) *Mt.* p. 240, No. 261; *Torr.* tab. 36, fig. 1; *very good condition, and rarer than the preceding:* *size* 5. *weight* $130\frac{9}{10}$ *grs.* 2

*** The first coin being adjusted to the Æginetan Talent, and the latter to the Attic.

278 Himera; compare *Mt. Supp.* p. 392, No. 230; but the cock on the obverse is turned to the right, and there are two pellets in the field; *in very fine preservation:* *size* 4. *weight* $88\frac{2}{10}$ *grs.*

Himera; (*rev.* Crab) *Mt.* p. 240, No. 261; *Torr.* tab. 36, fig. 1; *very fine condition, and more rare than the preceding:* *size* $4\frac{1}{2}$, *weight* $132\frac{6}{10}$ *grs.* 2

*** This coin is an Attic Didrachm, and the preceding an Æginetan Drachm.

279 Himera; compare *Mt.* p. 240, No. 264, and *Torr.* tab. 35, fig. 9 and 10; compare also *Mt. Supp.* p. 393, No. 235, and *Hunter*, tab. 30, fig. 20; *obv.* [IME]PAION. naked old Faun riding on a goat to the right, holding a rhyton to his mouth; *rev.* NIKA. winged and draped Victory advancing to the left, with a palm branch in her extended right hand; in the field, an uncertain object, appearing like a wavy line, query a vine? *of most extreme rarity; not in the French collection; fair condition, though rubbed:* *size* 3.

*** The rarity of this coin, and the want of condition when found, has probably been the cause of the erroneous descriptions above quoted.

Himera; *Mt.* p. 240, No. 265; *Torr.* tab. 35, fig. 11: *size* 2.

Uncertain; *obv.* Head of Diana to the right, (compare *Mionnet, Supp.* vol. 6, pl. 3, fig. 2); *rev.* NIΣYPIΔAΣ? IMEPAIOΣ? naked Male Figure, the lower part draped, seated on a rock, seen almost in front, a long staff in his right hand: *size* $3\frac{1}{2}$. 3

*** This uncertain coin seems to be unpublished. Its rubbed and middling condition is much to be regretted, as well as an unpleasant sandy appearance on both sides. It has however interest, as a cast, till the coin be known from which it was taken.

WITH THE NAME OF THERMÆ.

280 Thermæ; *obv.* ΘEPMITAN. Female Head to the right, with a raised tiara ornamented with three half griffins, and long flowing hair, (like Juno on the coins of Argos); behind the head is a dolphin; *rev.* Hercules, youthful and naked, holding his club in his right hand, sitting on a rock, which is partly covered with the lion's skin; in the field behind him is his bow and quiver; *unpublished, and presumed to be unique; fine work, and very well preserved, except that the back part of the head of Juno has suffered somewhat from oxide:* *size* 6. *weight* $129\frac{3}{10}$ *grs.* 1

*** The type is almost the same as on the small coins published by Hunter, tab. 59, fig. 8, and Torremuzza, tab. 90, fig. 4; Mionnet, p. 242, No. 279.

281 Leontini; *obv.* AEONTINON. Lion's Head in profile, to the right, surrounded by four grains of barley; *rev.* Triga, in slow motion, driven by a draped and bearded male figure; above is a floating winged female about to crown the horses; *compare Torremuzza,* tab. 39, fig. 10; *fine old work, and very rare in such beautiful condition:* *size* $6\frac{1}{2}$. *wt.* $271\frac{2}{10}$ *grs.* 1

*** It is very remarkable that Mionnet should have described only *one coin of this type,* (*as a biga*) and that has a truncated inscription—see No. 330, p. 247. In the Hunter collection there are only two.

282 Another; but the letters surround the four grains of barley, in the midst of which is the lion's head, in profile, to the right, as usual; *perfect preservation on both sides, and a very fine coin as to workmanship:* *size* $6\frac{1}{2}$. *weight* $268\frac{2}{10}$ *grs.* 1

283 Another; but the letters are *within* the four grains of barley; *rare, and in fine condition:* *size* $6\frac{1}{2}$. 1

284 Leontini; *obv.* VEONTINON. Head of Apollo to the right, with the hair of female character, and wreath of laurel; around are placed three laurel leaves, and a lion to the right underneath; *rev.* Female conducting a triga to the right; above, a winged female is about to crown her; in the exergue, is a lion running to the right; see *Havercamp*, tab. 95, fig. 1; *excessively rare, and in very fine condition:*
size 7. *weight* $267\frac{3}{10}$ *grs.* 1

285 Another; from the same die on the obverse, but not on the reverse; *not so well struck, or so well preserved as the preceding:* . . *size* 7. 1

286 Leontini; *obv.* Head of Apollo, hair of female character, to the left, with laurel wreath; *rev.* VEONTINON. Lion's head, in profile, to the right, surrounded by three grains of barley, and a fish underneath, in place of the fourth grain; *fine and very rare type:* . *size* $6\frac{1}{2}$. 1

287 Leontini; *Mionnet*, p. 246, No. 318; different character of head to the right, and finer work than usual; *fine condition, and very rare:* *size* $7\frac{1}{2}$. *weight* $264\frac{3}{10}$ *grs.* 1

288 Another; with a tripod behind the lion's head in place of the fourth grain of barley; see *Torr.* tab. 39, fig. 5; *extremely rare, and in good condition:* . *size* 6. 1

289 Another; but without the tripod; *very sharp and well preserved, especially on the reverse:* *size* 7. *wt.* $270\frac{1}{10}$ *grs.* 1

290 Another; *very well preserved:* *size* 6. *wt.* $264\frac{9}{10}$ *grs.*
Leontini; *Torr.* tab. 39, fig. 1; *in very fine condition, but false:* . *size* 7. *weight* $255\frac{9}{10}$ *grs.* 2

*** This coin is curious, as a very fine specimen of one of the oldest fabrications extant, having been published by Goltzius in 1576, and by Paruta in 1612. It may be presumed that the prototype of this singular fancy, was a coin similar to that engraved in Mionnet, vol. vii. pl. 66, fig. 7.

291 Leontini; *Mt.* p. 246, No. 315; *Torr.* tab. 40, fig. 13; *beautifully preserved:* *size* 2. *weight* $13\frac{1}{10}$ *grs.*
Leontini; ΛEONTINO. (sic.) retrograde; *Mt.* p. 247, No. 331; *Torr.* tab. 40, fig. 2; *extremely well preserved, and rare of this size* (Didrachm): *size* 5. *weight* $134\frac{4}{10}$ *grs.* 2

292 Another; (Didrachm) like the preceding, and *well preserved.*
Leontini; *Mt.* p. 246, No. 316; *Torr.* tab. 40, fig. 10; on the altar K retrograde; *beautifully preserved, and rare.*
size 2. *weight* $12\frac{3}{10}$ *grs.*

Zancle; compare with *Mionnet*, pl. 47, fig. 5, and *Hunter*, tab. 37, fig. 2; *in very fine condition, and very rare, but the absence of certain peculiarities in the type of the reverse, which are always observable on these coins, gives rise to suspicion that this not genuine: size* $5\frac{1}{2}$. *wt.* $88\frac{9}{10}$ *grs.* 3

293 Messana; *Torremuzza*, tab. 46, fig. 4; under the hare is the head of Pan to the right; *very fine, and very rare: size* 7. *weight* $265\frac{4}{10}$ *grs.* 1

294 Another; *Torr.* tab. 46, fig. 15; under the hare is an eagle devouring a serpent, to the left; *extremely rare and fine: size* $6\frac{1}{2}$. *weight* $263\frac{5}{10}$ *grs.* 1

(Continued at page 54).

GOLD COINS OF THE CARTHAGINIANS, ATTRIBUTED TO PANORMUS.

*** The greater part, if not the whole, of these coins belong to Carthage, and would be more properly classed there. It is not so evident that the gold coins of the Carthaginians were struck in Sicily, as it is that a large proportion of those of silver are of Sicilian mintage.

295 Panormus; *Mionnet*, page 265, No. 463; *Pellerin Recueil*, pl. 88, fig. 4; *extremely rare, and in good preservation: size* $5\frac{1}{2}$. *weight* $165\frac{3}{10}$ *grs.* 1

296 Another; *in better preservation, but a little battered at the edge: size* $5\frac{1}{2}$. *weight* $164\frac{4}{10}$ *grs.* 1

*** These coins appear to be Tridrachms of the Alexandrian talent, and to have been struck at Carthage.

297 Panormus; *Mt.* p. 265, No. 455; *Pell. Rec.* pl. 88, fig. 5; *exquisite preservation, and fine work: size* $4\frac{1}{4}$. *weight* $145\frac{6}{10}$ *grs.* 1

298 Another; *as well preserved, but a very slight blow on the hind legs of the horse: size* 4. *weight* $142\frac{6}{10}$ *grs.* 1

299 Another; but the ears of corn rather more separated, and the horse stands on a dotted line or base, supported at one end by the minute head of a goat, and at the other by an eye; in the field, near the feet of the horse, are three minute pellets; *fine work, and beautiful condition: size* $4\frac{1}{4}$. *weight* $145\frac{9}{10}$ *grs.* 1

*** This peculiarity renders this coin very interesting, and probably unique.

300 Another; but without those peculiarities; the head larger, and not surrounded by a circle of dots; *fine work, and condition:* . *size* 4. *weight* 117$\frac{4}{10}$ *grs.* 1

*** The weight of this coin is remarkable, being the Didrachm of the Tyrian or Phœnician talent, and probably struck at Carthage.

CITIES OF SICILY, IN SILVER. (*Continued from page* 45.)

LOT

363 Messana; *Torremuzza*, tab. 47, fig. 6; on the *obv.* a sprig of laurel in the exergue, and the Victory elegantly dancing on the reins and pole of the biga; *very rare, and well preserved: size* $6\frac{1}{2}$. *weight* $265\frac{1}{10}$ *grs.* 1

364 Another; *Torr.* tab. 46, fig. 1; *Mt.* p. 255, No. 384; ΜΕΣΣΑΝΙΟΝ, in exergue, blade of corn under the hare, and Eagle above; *well preserved, and rare: size* $6\frac{1}{2}$. 1

365 Another; *Mionnet*, p. 255, No. 383; but with the inscription retrograde, and the head of Pan to the left, under the hare; *very good condition, and very rare: size* $6\frac{1}{2}$. 1

366 Another; *Mt.* p. 254, No. 378; but the car is drawn by one horse; *in very good condition: size* 7. *wt.* $264\frac{2}{10}$ *grs.* 1

367 Morgantia; compare *Mt. Supp.* p. 406, No. 307; *Hunter*, tab. 38, fig. 12; and *Torr.* tab. 51, fig. 2; *obv.* ΜΟΡΓΑΝΤΙΝΩΝ, Minerva with triple crested helmet, seen full face; *rev.* ΜΟΡΓΑΝΤΙΝ[ΩΝ], winged and draped Female, seated to the left, holding a wreath in her extended right hand; underneath is a dolphin, to the right; *very fine work, and very good condition, but a little blurred by black oxide; of extreme rarity: size* 2. *weight* $14\frac{6}{10}$ *grs.*

*** On this coin, the figure is decidedly not seated on the prow of a vessel; neither is it apparent on what she is seated. Certain wavy lines under the figure, seem to indicate a rock, or the sea shore; the sea itself being symbolized by the dolphin underneath. Combe's coin is probably the same, but not well preserved.

Motya; *Torremuzza*, tab. 52, fig. 1; *Mionnet, Supp.* p. 407, No. 316; *fine condition, but false:*

size 6. *weight* 149 *grs.* 2

*** This is another of the older fabrications.

368 Naxus; compare *Mt.* p. 262, No. 438, and *Hunter*, tab. 39, fig. 15, but the legend of this coin is not retrograde; *very fine condition, and of extreme rarity, but not free from suspicion:* *size* $4\frac{1}{2}$. *weight* 89 *grs.* 1

369 Naxus; *Torr. Auct.* 2, tab. 4, fig. 1; *Combe, Mus. Brit.* tab. 4, fig. 8; *a remarkably fine and undoubted coin, in the highest preservation, and of extreme rarity:*

size $7\frac{1}{2}$. *weight* $265\frac{8}{10}$ *grs.* 1

370 Another; *from the same die, obverse and reverse, and in the same extraordinary preservation:*

size $7\frac{1}{2}$. *wt.* $268\frac{6}{10}$ *grs.* 1

*** The erroneous notion, to be found in the works of some of the older authors, that no instance ever occurred of two genuine Greek coins from the same die, is corrected by modern experience and observation. This cabinet alone furnishes abundant proof to the contrary.

371 Naxus; *Mt.* vol. vii. pl. 66, fig. 3; *Supp.* p. 408, No. 319: but the Silenus, or rather the old faun, is sitting near a *plant of ivy* instead of a *cep de vigne*, and holding *a thyrsus* instead of *une palme;* compare *Torr.* tab. 53, fig. 1; *a most beautiful coin, in the highest condition, and of the utmost rarity:*

size 7. *weight* $260\frac{8}{10}$ *grs.* 1

372 Another: the head from the same die as the preceding coin, but not the reverse, although it is exactly of the same type; *in the same beautiful state as the preceding coin:*

size 7. *weight* $267\frac{8}{10}$ *grs.* 1

373 Another; *in the same beautiful condition, but not free from suspicion:* *size* $7\frac{1}{2}$. *weight* $254\frac{9}{10}$ *grs.* 1

374 Naxus; *Torr.* tab. 53, fig. 6; not in *Mt.* *obv.* NAΞIΩN, Head of Apollo laureate, to the right, the hair like that of a female; behind, is a laurel leaf and berry; *rev.* an old faun sitting, looking to the left towards a diota in his right hand, in his left is a thyrsus; in the field, to the left, is an ivy plant, and to the right, a priapic terminus; *of most extreme rarity; fine old work, and in fine preservation:*

size 5. *weight* $129\frac{5}{10}$ *grs.* 1

375 Naxus; not in *Torr.* or *Mt.*; *obv.* approaching to *Torr. Auct.* 2, tab. 4, fig. 1; *rev.* NAXION, somewhat similar also,

but the old faun in a different position; *fine old work, splendid condition, and of the utmost rarity:*

size 4. *weight* $65\frac{9}{10}$ *grs.* 1

*** This Drachm, in style and age, corresponds precisely to the Tetradrachms forming lots 369 and 370.

376 Another; from the same die on both sides; *not quite so well preserved, but a very fine coin:* *size* 4. *wt.* 67 *grs.* 1

377 Naxus; compare *Mt. Supp.* p. 409, No. 329; *Torr.* tab. 53, fig. 5; *obv.* ΑΣΣΙΝΟΣ.; *rev.* ΝΑΞΙΩΝ.; *of excessive rarity, and in excellent condition, but with a thin coating of black oxide:* . *size* $2\frac{1}{2}$. *weight* $31\frac{1}{10}$ *grs.* 1

GOLD COINS OF THE CARTHAGINIANS, ATTRIBUTED TO PANORMUS. *(Continued from page 46.)*

378 Panormus; *obv.* same head as on lot 297; *rev.* Horse standing, to the right, before a palm tree; *fine work, very well preserved, and of extreme rarity:*

size $2\frac{1}{2}$. *weight* $71\frac{6}{10}$ *grs.* 1

*** This coin, evidently the half size of the coins forming lots 297, 298, and 299, is presumed to be unpublished.

379 Panormus; *obv.* same style of head as lot 295; *rev.* Horse *trotting* to the right; *presumed to be a very rare variation in the type of these coins:* *size* 3. *weight* $43\frac{2}{10}$ *grs.*

Panormus; *obv.* Horse's head, to the right; *rev.* Palm Tree, with dates; *fine:* *size* $\frac{1}{2}$. *weight* $13\frac{4}{10}$ *grs.* 2

380 Panormus; *Mt.* p. 265, No. 456; *Hunter*, tab 14, fig. 20; *fine preservation:* *size* $1\frac{1}{2}$. *weight* $26\frac{6}{10}$ *grs.*

DODECADRACHM, OR LARGE MEDALLION, OF THE CARTHAGINIANS, IN SILVER.

*** This coin, which is a *Dodecadrachm*, should not be confused with the smaller medallions, or *Decadrachms*, of Carthage, of the usual size,

and weighing about 575 to 580 grains troy, with the pegasus, and four Punic letters, on the reverse: engraved in Mionnet, vol. vii. pl. 66, fig. 4; and Pellerin, Recueil, pl. 88, fig. 6.

381 Carthage; *obv.* a Female Head, ornamented with ears of corn, to the left, like *Mionnet*, vol. vii. pl. 66, fig. 4; *rev.* no Punic letters; a Horse galloping to the left, in very low relief; *not in Mionnet; fine work, in perfect preservation; of the very highest degree of rarity, if not unique, and presumed to be unpublished:* *size* 11. *weight* $701\frac{3}{10}$ *grs.* 1

*** This beautiful and remarkable coin was most probably struck at Carthage. It is the heaviest hitherto known in the Greek series, being a *Dodecadrachm* of the Tyrian, or Phœnician talent. The Drachm of this very ancient talent therefore weighed 58 to 59 grains; and the Tetradrachms (with dates) of Aradus (a Phœnician city and island), weighing 235 grains, among those of many other cities of Asia and Africa, furnish us perhaps with the latest examples of the same Drachm and talent.

There is in the British Museum a most rare *Hexadrachm* of Berenice, wife of Ptolemy III., from the cabinet of Mr. Burgon, which, though a little rubbed, weighs $326\frac{1}{2}$ grains. Its full weight would have been 330 to 333 grains, being a Hexadrachm of the Ægyptian or Alexandrian talent, of which the Drachm weighed $54\frac{1}{2}$ to $55\frac{1}{2}$ grains. The existence of this Hexadrachm, proves, not only the probable existence of Dodecadrachms, but the two coins taken together, render it extremely probable that the old Tyrian or Phœnician talent, merged during the sway of the Ptolemies, into the talent of Ægypt.

SILVER COINS OF THE CARTHAGINIANS, ASCRIBED TO DIONYSIUS II.

*** It is well known that many of the following coins, ascribed to Dionysius, and to Panormus, by the early writers, belong in fact to Carthage, and would be more properly classed there. It may be presumed, however, that those of very fine work, and of the Sicilian style of mintage, were struck at Panormus, and other cities of Sicily, which were occupied by the Carthaginians. A knowledge of the Punic inscriptions, can alone lead to the correct classification of these coins. It is deeply to be regretted that the learned Gesenius was not aided by a competent numismatist, in his researches into this subject; as his valuable work, entitled *Scripturæ Linguæque Phœnicia Monumenta, &c. Lipsiæ*, 1837, 4to. appears to be the nearest approximation to an explanation of the Punic inscriptions on this most interesting class of coins. See *Journal des Savans*, 1838; an article by M. Etienne Quatremère on this learned work.

382 Panormus, ascribed to Dionysius II.; *Torremuzza, Auct.* 2, tab. 9, fig. 2; *obv.* Horse galloping to the right, a winged

female is floating above, and about to crown the animal with a wreath; *rev.* Palm Tree with dates; *most beautiful work, in perfect condition, and of the utmost degree of rarity:*
size $6\frac{1}{2}$. *weight* $260\frac{1}{10}$ *grs.* 1

383 Another, of this class; *Mt. Supp.* page 455, No. 20; *Torr. Auct.* 2, tab. 9, fig. 1; *fine work, perfect condition, and extreme rarity:* *size* $6\frac{1}{2}$. *weight* $265\frac{5}{10}$ *grs.* 1

384 Another, like the last; but the type of the obverse is exactly reversed, the half horse being to the right; *coarser work, and not in such condition as the last, though a very fair coin, and of extreme rarity:* *size* 7. *weight* $257\frac{8}{10}$ *grs.* 1

SILVER COINS OF THE CARTHAGINIANS, ASCRIBED TO PANORMUS.

*** *The use of the word* Another, *in describing these coins, implies not only the same type, but the same Punic letters, except when specified to the contrary.*

---

385 Panormus; *Mionnet*, p. 267, No. 481; *Combe, Brit. Mus.* p. 73, No. 33; *rather second rate workmanship, very fine preservation, and extremely rare:*
size 8. *weight* $266\frac{3}{10}$ *grs.* 1

386 Another; *very well preserved:* *size* $6\frac{1}{2}$. 1

387 Another; but the hair without the wreath of corn, and a broad band in front; *rev.* the car to the left, and a caduceus in front of the horses; the same Punic letters in the exergue, under the car; *inferior work, but very fine condition, and of extreme rarity:* *size* 7. *weight* $260\frac{8}{10}$ *grs.* 1

388 Another; *Mt.* p. 268, No. 484; *very beautiful work, especially on the reverse; perfect condition, and extreme rarity:*
size $6\frac{1}{2}$. *weight* $253\frac{8}{10}$ *grs.* 1

389 Panormus; *obv.* Female Head, with wreath of corn, to the left, surrounded by four dolphins; *rev.* Horse galloping, to left, passing a palm tree bearing dates; *not in Mionnet; very beautiful work, of excessive rarity, and in perfect preservation:* *size* 7. *weight* $262\frac{2}{10}$ *grs.* 1

390 Panormus; *obv.* same head, to the right, but without dolphins; in front is a candelabrum; *rev.* Horse trotting, to the right, passing a palm tree bearing dates; near his head is a floating winged female figure, about to crown him; in the field, in

front, is a caduceus, and two Punic letters near the horse's feet; *presumed to be unpublished and unique; fine work and condition:* *size* $6\frac{1}{2}$. *weight* $267\frac{2}{10}$ *grs.* 1

391 Another; but the head to the left, and no accessory symbol; *rev.* Horse trotting to the left, passing a palm tree bearing dates; *very rare, good work and condition:*
size 6. *weight* $262\frac{9}{10}$ *grs.* 1

392 Another; the ends of four Punic letters are visible behind the head; *very rare, good work and condition:*
size 6. *weight* $260\frac{7}{10}$ *grs.* 1

393 Another; a dolphin behind the head, and the hair disposed quite differently, but with the blade of corn; *rev.* the same, but the horse standing to the right, and in the field a crescent behind; *rather inferior work, fine condition, and very rare:* *size* $6\frac{1}{2}$. *weight* $265\frac{8}{10}$ *grs.* 1

(Continued at page 69.*)*

GOLD COINS OF SYRACUSE.

394 Syracuse; *Mionnet, Supp.* p. 426, No. 473; *Torremuzza,* tab. 68, fig. 4; *Hunter,* tab. 52, fig. 4; but instead of a lyre, there is a bow behind the Diana, and also behind the Apollo; *a most rare and elegant coin, in perfect preservation:*
size $4\frac{1}{2}$. *weight* $105\frac{9}{10}$ *grs.* 1

*** It appears from Mionnet that this coin does not exist in the French collection. There is only one in that of Hunter.

395 Another; but having a tripod behind the Apollo, and also behind the Diana: *size* $4\frac{1}{2}$. *weight* $109\frac{8}{10}$ *grs.* 1

*** This appears to be an unpublished variety of this extremely rare and most elegant coin. The perfect condition of this, is fully equal to that of the preceding, if it does not surpass it.

396 Syracuse; *Mt.* vol. vii. pl. 67, fig. 2; but behind the head is a grain of barley, and also under the Hercules is a grain of barley: *size* 3. *weight* $89\frac{3}{10}$ *grs.* 1

*** This most happy effort of Greek art, is in remarkably high relief, and in most perfect preservation. Its rarity as a coin need not be pointed out.

397 Syracuse; *Mt.* p. 289, No. 690; but no Σ under; behind the head of Apollo, is an ear of wheat; *a perfect gem; of most beautiful workmanship, and as it came from the die:*
size 3. *weight* $66\frac{5}{10}$ *grs.* 1

398 Another; but nothing behind the head of Apollo; *not quite so desirable a coin as the preceding, but very fine, and in the highest condition:* *size* 3. *weight* 66 *grs.* 1

399 Syracuse; *Mt.* p. 290, No. 703: *Hunter*, tab. 52, fig. 5; *a most elegant coin, in the highest condition, and extremely rare. The horse on the reverse is a most happy effort of Greek art:* . *size* 2. *weight* $44\frac{5}{10}$ *grs.* 1

*** Mionnet seems to have had a very imperfect notion of the rarity and value of this most scarce type.

400 Syracuse; *Mt.* p. 291, No. 714; *Torr.* tab. 68, fig. 18; *this most beautiful coin is as it came from the die; its rarity is greater than that of the preceding coin:* *size* $2\frac{1}{2}$. *weight* $41\frac{3}{10}$ *grs.* 1

*** It does not exist in the French collection, according to Mionnet, and is not in the Hunter collection.

401 Syracuse; same type as lots 397 and 398, but without ΣΥΡΑΚΟΣΙΩΝ, and having the letters ΕΥ in a monogram in the exergue; *the workmanship, particularly of the head of Apollo, is of the very highest order, and the preservation of this gem of Greek art is perfect; in this state it is of extreme rarity:* . *size* $2\frac{1}{2}$. *weight* 44 *grs.* 1

*** The letters EY, in a monogram, are probably the initial letters of the artist's name; and this coin may have been a rival production to those forming lots 397 and 398. The letters ΣΩ, and the monogram AP, which may be observed on other gold coins of Syracuse, of this collection, are also most probably the initials of artists. This usage seems not intended, or calculated, to transmit their names to posterity, but indicates a great spirit of rivalry and emulation among them, which resulted in the production of these most surprising and elegant specimens of ancient art. The silver coins of Syracuse are also very remarkable for the great variety of artists' names which they furnish.

402 Syracuse; [ΞΕΥ]Σ ΕΛΕΥ[ΘΕΡΙ]ΟΣ, *Mt.* p. 290, No. 707; *Hunter*, tab. 52, fig. 6; in the field of the reverse, is AP. in a monogram, and three pellets; *very rare, beautiful work, and in very good preservation:* *size* 2. *wt.* $33\frac{1}{10}$ *grs.* 1

403 Another; from the same die, *obv.* and *rev.*; *not quite in such good preservation:* *size* 2. *weight* $33\frac{2}{10}$ *grs.* 1

(*Continued at page* 73.)

SILVER DECADRACHMS OF SYRACUSE, COMMONLY CALLED SYRACUSAN MEDALLIONS.

*** Any collection possessing three or four of these magnificent specimens of ancient Greek art, at its best period, is generally esteemed rich. To prevent, therefore, a false notion of the degree of rarity of these coins, which might arise from seeing so many together, we beg to refer the young collector to the remark which follows lot 170, at page 26.

404 Syracuse; (a Medallion,) ΣΥΡΑΚΟΣΙΩΝ, *Mionnet*, p. 298, No. 771; the hair in a net, but without the K on the diadem; on the reverse, under the prize armour, is the word ΑΘΛΑ.; compare *Torremuzza*, tab. 72, fig. 1; *a magnificent specimen of this very rare type, and highly preserved:*

size 10. *weight* $664\frac{9}{10}$ *grs.* 1

405 Another; ΣΥΡΑΚΟΣΙΩ. (sic.) with K. on the diadem, and ΚΙΜΩΝ. on the dolphin under the neck, but not shewing the word ΑΘΛΑ.; *Hunter*, tab. 52, fig. 9; *but Combe appears not to have perceived the artist's name on the dolphin. The preservation is superior to that of the last, and the character of the head quite different: size* 10. *wt.* $668\frac{5}{10}$ *grs.* 1

*** A most splendid coin, and very probably a rival production to the preceding.

406 Another; without K. on the diadem; of a very beautiful character, but quite different from the preceding: ΣΥΡΑΚΟΣΙΩΝ. quite on the edge of the coin, but very legible; *a very beautiful specimen of this rare type; the reverse clean, and shewing all the car and charioteer: size* 10. *wt.* $663\frac{1}{10}$ *grs.* 1

*** The die broke in striking this coin, and has left a large flaw under the neck, but the effect of it is far from disagreeable.

407 Syracuse; ΣΥΡΑΚΟΣΙΩ[N.] same type as *Mt.* vol. vii. pl. 67, fig. 3, and *Torr. Auct.* 2, tab. 6, fig. 2, except the scallop shell; *a most beautiful and elegant expression of face, the reverse clean, and shewing all the type; in admirable preservation, and very rare:*

size 10. *weight* $662\frac{8}{10}$ *grs.*

408 Another; ΣΥ[ΡΑΚΟΣΙΩΝ.], under the head, ΕΥΑΙΝΕ.; *Torr. Auct.* 1, tab. 7, fig. 2; *very fine expression of face, different from the last. A spread coin, shewing the whole type on both sides; the reverse very beautiful and clean; the preservation on both sides extremely good:*

size 11. *weight* $667\frac{3}{10}$ *grs.* 1

409 Another; ΣΥΡΑΚΟΣΙΩΝ. with the scallop shell behind the neck; *Mionnet*, pl. 67, fig. 3; *the obverse very fine, and beautifully preserved; the reverse in good condition:*
size 11. *weight* $667\frac{9}{10}$ *grs.* 1

410 Another; [ΣΥΡΑΚΟ]ΣΙΩΝ. and under the head [ΕΥ]ΑΙΝΕ.; *a very beautiful coin, in fine condition on both sides, shewing the car, charioteer, and horses, in great perfection:*
size $10\frac{1}{2}$. *weight* $665\frac{5}{10}$ *grs.* 1

411 Another; [ΣΥΡΑΚ]ΟΣΙΩΝ; and with ΕΥΑΙΝΕ. under the head; *the face on this coin has a most elegant feminine expression, and is in very fine condition, but the die a little flawed on the reverse:* *size* $10\frac{1}{2}$. *weight* 668 *grs.* 1

412 Another; ΣΥΡΑΚΟΣΙ[ΩΝ.] from the same die on the obverse; *in very excellent condition, and shewing the horses and car very well on the reverse, but only part of the charioteer:*
size 10. *weight* $665\frac{2}{10}$ *grs.* 5

413 Another: ΣΥΡΑΚΟΣΙΩΝ, the word ΕΥΑΙΝΕ. under the neck not visible; *a fine spread coin, the face having a very beautiful expression, and well preserved on both sides, shewing the whole of both the types:* *size* $10\frac{1}{2}$. *weight* 666 *grs.* 1

*** The reverse of this coin is from the same die as that of lot 411, but not the obverse.

414 Another; [ΣΥΡΑ]ΚΟΣΙΩΝ. and under the head [ΕΥΑΙ]ΝΕ.; *very well preserved on both sides, but a little encrusted with black oxide, which may be carefully removed:*
size $10\frac{1}{2}$. *weight* $664\frac{8}{10}$ *grs.* 1

*** This coin is from the same die, on both sides, as the preceding.

415 Another; [ΣΥΡΑΚΟ]ΣΙΩΝ. with a scallop shell behind the neck; *a very good specimen of this very rare coin, and well preserved, but the reverse somewhat blurred:*
size 10. *weight* $667\frac{2}{10}$ *grs.* 1

416 Another; [ΣΥΑΚ]ΟΣΙΩΝ., but only shewing two dolphins; *clean and well preserved, and a most agreeable expression of the face; reverse very well preserved, but the head of the fourth horse not visible:* *size* $9\frac{1}{2}$. *weight* $661\frac{1}{10}$ *grs.* 1

SYRACUSAN MEDALLIONS IN SILVER.

(Continued from page 62).

514 Syracuse; (a Medallion) ΣΥΡΑΚΟΣΙΩ. (sic.) *Mionnet*, page 298, No. 771; with the hair in a net, K. on the diadem, and ΚΙΜΩΝ. on the dolphin under the neck; see *Hunter*, tab. 52, fig. 9; but *Combe* appears not to have perceived the artist's name on the dolphin; *a very clean and well preserved specimen of this most rare type. The two dolphins in front of the head, on the obverse, and on the reverse, the charioteer, are only partially visible: size* $9\frac{1}{2}$. *weight* $669\frac{8}{10}$ *grs.* 1

*** This coin, obverse and reverse, is from the same die as lot 405, but not so much spread.

515 Another; ΣΥΡΑΚΟΣΙΩΝ. without K. on the diadem, but with ΚΙΜΩΝ. on the dolphin under the neck; the expression of the face quite different from the preceding; *a very beautiful specimen of this rare coin, but the die of the reverse is blurred in the field: size* $9\frac{1}{2}$. *weight* $665\frac{4}{10}$ *grs.* 1

516 Syracuse; ΣΥΡΑΚΟΣΙΩΝ, the same type as *Mionnet*, vol. vii. pl. 67, fig. 3; but with a star behind the head, and a pellet in front; *very well preserved on both sides, and shows the whole of the types; a very fine specimen: size* 10. *weight* $666\frac{5}{10}$ *grs.* 1

517 Another; [ΣΥΡΑΚΟ]ΣΙΩΝ, from the same die, *obv.* and *rev.*, as the preceding, *but not quite so fine a coin, or so much spread: . size* $9\frac{1}{2}$. *weight* $667\frac{1}{10}$ *grs.* 1

518 Another; [ΣΥΡ]ΑΚΟΣΙΩΝ, with the scallop shell behind the neck; *beautiful expression of face, and fair condition; but the two dolphins in front of the head, and in part the charioteer and the armour are not visible; also the reverse rather blurred: . size* 9. *weight* 667 *grs.* 1

519 Another; [ΣΥΡΑΚΟΣΙΩΝ], with Δ in front of the neck, an ΕΥΑΙΝΕ. visible under it; *the obverse in good condition, except a slight blow on the cheek; and the reverse extremely good, particularly the horses: size* 10. *wt.* $663\frac{9}{10}$ *grs.* 1

520 Another; [ΣΥΡΑΚΟΣΙΩΝ], from the same die on both sides, *the obverse better than the preceding specimen, but the reverse not quite so good: size* 10. *weight* 667 *grs.* 1

521 Another; but *without* the legend, ΣΥΡΑΚΟΣΙΩΝ, and with a scallop shell behind the head; a different expression of face

from any of the preceding; *very well preserved on the obverse, and the reverse in fair condition:*

size $9\frac{1}{2}$. *weight* $668\frac{9}{10}$ *grs.* 1

*** As the legend constantly occurs on these coins, this specimen, of which the die appears never to have had a legend, offers a very uncommon variation in the type.

522 Another; ΣYPAKOΣIΩN, with a scallop shell behind the head; *a slight double striking on the chin, but a fine spread coin; the obverse in very good condition, the reverse unfortunately blurred:* *size* $10\frac{1}{2}$. *weight* $668\frac{9}{10}$ *grs.* 1

523 Another; [ΣYPAKOΣIΩN], a pellet in front of the neck; *in fair condition, obverse and reverse, but somewuat scratched and ill used:* *size* $9\frac{1}{2}$. *weight* $654\frac{9}{10}$ *grs.* 1

524 Another; ΣYPAKO[ΣIΩN], *a spread coin, well preserved, and the expression of face very beautiful, but the obverse has a thin coating of black oxide, and the die partially blurred; it may be much improved by judicious cleaning. The reverse very fair, showing the car, the charioteer, and the cuirass, greaves, and helmet, extremely well:*

size $10\frac{1}{2}$. *weight* $660\frac{8}{10}$ *grs.* 1

*** This most important suite of beautiful and rare coins, has been thus minutely and accurately described for the sake of distant collectors, who may not be enabled to have the satisfaction of a personal inspection.

TETRADRACHMS OF SYRACUSE, IN SILVER.

592 Syracuse; *Mionnet*, p. 297, No. 762, pl. 67, fig. 4; and *Torremuzza, Auct.* 2, tab. 6, fig. 3; ΑΡΕΘΟΣΑ. full face, with

KIMΩN. on the diadem in front, &c.; *a beautiful spread coin, somewhat rubbed, but in very fine condition, of the most elegant and admirable workmanship, and one of the rarest coins in the Sicilian series: size* $8\frac{1}{2}$. *weight* 263 *grs.* 1

*** This appears to be the identical coin engraved by Torremuzza, as above quoted.

593 Syracuse; *Mt.* p. 297, No. 765; *Torr.* tab. 74, fig. 8; but with an ear of wheat in the exergue instead of a dolphin: *size* $7\frac{1}{2}$. *weight* $241\frac{1}{10}$ *grs.* 1

*** This most beautiful and interesting type is more rare than the preceding, but has the disadvantage of a partial coating of black oxide, and has suffered from having been in circulation, and from not having been well struck, yet its condition is very passable, especially considering that its scarcity is such as to preclude the hope of ever seeing a better.

594 Syracuse; *Mt.* p. 47, fig. 1; *Hunter*, tab. 52, fig. 11; ΣYPA-ϘOΣION, with the quadratum incusum; *in very perfect condition, curious old work, and of extreme rarity: size* 7. *weight* $269\frac{2}{10}$ *grs.* 1

*** Mionnet does not seem to have been aware of the high degree of rarity to which this coin is entitled.

595 Syracuse; *Torr. Auct.* 2, tab. 7, fig. 3; same type as the *old* Medallion of Syracuse engraved in *Hunter*, tab. 52. fig. 10; *very rare, and in fine condition, except a little black oxide on the obverse: size* $7\frac{1}{2}$. *weight* 265 *grs.* 1

597 Syracuse; *Torr. Auct.* 2, tab. 7, fig. 2; *old work, in very fine condition, and very rare type: size* $7\frac{1}{2}$. *weight* $262\frac{8}{10}$ *grs.* 1

598 Syracuse; *Torr.* tab. 74, fig. 4; *very fine work, in extremely fine condition, and rare: size* 6. *weight* $197\frac{8}{10}$ *grs.* 1

599 Syracuse; *Torr. Auct.* 1, tab. 7, fig. 3; *fine work, very fine condition, and very rare type: size* $6\frac{1}{2}$. *wt.* 267 *grs.* 1

600 Syracuse; *Hunter*, tab. 52, fig. 15; *very fine work, in very beautiful condition: size* $6\frac{1}{2}$. *weight* $266\frac{1}{10}$ *grs.* 1

601 Syracuse; *Torr. Auct.* 2, tab. 6, fig. 6; on the obverse is the head of an old faun under the neck; *beautiful work, fine condition, and most rare type: size* 7. *weight* 264$\frac{9}{10}$ *grs.* 1

*** This appears to be the identical coin engraved by Torremuzza. The reverse is from the same die as lot 596, but the obverse is quite different. This coin shews the broken wheel among the feet of the horses, but not the broken harness, as seen in lot 596, because it is off the coin. On this coin, however, all the charioteer is visible. The type of this reverse cannot be all seen and appreciated without both coins.

602 Syracuse; ΣYRAϘOΣION. compare *Mionnet*, pl. 61, fig. 7; but the hair is turned up on this rare coin; *beautiful condition, and fine old work: size* 6$\frac{1}{2}$. *weight* 266$\frac{9}{10}$ *grs.* 1

603 Syracuse; *Hunter*, pl. 53, fig. 5; *fine work, very good condition, and very rare type: size* 7. *weight* 264 *grs.* 1

604 Syracuse; nearly like *Hunter*, tab. 53, fig. 14; *fine condition, and fine old work: size* 6. *weight* 265$\frac{2}{10}$ *grs.* 1

605 Syracuse; *Mionnet*, pl. 67, fig. 5; *Torremuzza*, tab. 73, fig. 16; NIK. in monogram under the neck; *in most perfect preservation, and of the same beautiful style of work as the Medallions of Syracuse: size* 7. *weight* 264$\frac{9}{10}$ *grs.* 1

606 Another; the obverse from the same die as the preceding, but not the reverse; *equally beautiful, and well preserved: size* 7. *weight* 265$\frac{1}{10}$ *grs.* 1

607 Syracuse; *obv.* compare *Hunter*, pl. 53, fig. 3: *rev.* a Quadriga to the left, and ear of wheat in exergue; *very fine work, and condition; rare type, but the reverse a little injured by oxide and double striking: size* 6$\frac{1}{2}$. *weight* 267$\frac{1}{10}$ *grs.* 1

608 Syracuse; like *Hunter*, pl. 53, fig. 14, except in the disposition of the letters; *very clean and well preserved, and fine old work: size* 6$\frac{1}{2}$. *weight* 270$\frac{3}{10}$ *grs.* 1

*** The weight of this coin is remarkable. It is the heaviest of all the Tetradrachms of Syracuse in this collection, and gives above 67$\frac{1}{2}$ grains to the Attic drachm. In the Hunter Collection only one Tetradrachm surpasses this in weight, No. 41, at p. 292, weighs 271$\frac{1}{2}$ grains. It is to be noted, that the Siculo-Attic drachm is often heavier than the real Athenian drachm, as indicated by the coins.

609 Syracuse; *Hunter*, tab. 53, fig. 3; EYAINETO. in a tablet over the horses; *extremely rare, very fine condition, and beautiful work: size* 6$\frac{1}{2}$. *weight* 264 *grs.* 1

*** This is no doubt the same artist whose name appears on some of the Syracusan Medallions.

610 Syracuse; *Torremuzza*, tab. 73, fig. 15; NI. under the neck; *in perfect condition, most beautiful work, and rare:* *size* $6\frac{1}{2}$. *weight* 265 *grs.* 1

611 Another; with a crack on the edge of the coin; from the same die, obverse and reverse, *in the same perfection, and of the same beauty:* *size* $6\frac{1}{2}$. *weight* $262\frac{9}{10}$ *grs.* 1

612 Syracuse; compare with *Torr.* tab. 72, fig. 7; but there is no diadem in front, and EYMHNOY. is under the neck; on the reverse, under the horses, is a stork, and in the exergue, a dolphin following another fish; *extremely rare type and fine work; the obverse in fine condition, but the reverse somewhat rubbed:* . *size* 7. *weight* $259\frac{4}{10}$ *grs.* 1

613 Syracuse; *Hunter*, tab. 52, fig. 16; but ΠΑΡΜΕ. not visible under the neck; *beautiful work, very rare type, and in fine condition:* *size* $6\frac{1}{2}$. *weight* $267\frac{6}{10}$ *grs.* 1

614 Syracuse; *Torremuzza*, tab. 77, fig. 8; *fine old work, good condition, and rare type:* *size* $6\frac{1}{2}$. *weight* $263\frac{6}{10}$ *grs.* 1

615 Syracuse; *Torr.* tab. 76, fig. 11; *fine old work, well preserved, and rare type:* *size* 6. *weight* $269\frac{1}{10}$ *grs.* 1

616 Syracuse; *Torr.* tab. 73, fig. 15; but with ΦI. under the neck; *beautiful work, and in fine condition:* *size* $6\frac{1}{2}$. *weight* $264\frac{7}{10}$ *grs.* 1

618 Another; but with the griffin on the helmet, and A. on the edge of the helmet, behind the neck; on the reverse, the letters $\frac{\Upsilon A}{\Sigma A}$ instead of ΞA.; *in most perfect condition:* *size* 6. *weight* $158\frac{6}{10}$ *grs.* 1

size 5. *weight* $132\frac{8}{10}$ *grs.*

Another; *Torr.* tab. 71, fig. 15; without legend, and with the triquetra under the pegasus; *very rare, and in perfect condition:* . *size* $4\frac{1}{2}$. *weight* $100\frac{7}{10}$ *grs.* 3

*** This coin is very remarkable for its weight. The other two are evidently didrachms of the Attic Talent.

623 Another; (Attic Didrachm) *Torr.* tab. 71, fig. 10; *in the finest preservation:* *size* 5. *weight* $133\frac{9}{10}$ *grs.*

size 3. *weight* $65\frac{5}{10}$ *grs.* 1

*** There is on this individual coin a difference in the style of work and arrangement of the hair, which seems to indicate a coinage somewhat earlier than that of the usual style, as shewn in the following specimens.

637 Another; with a bucranium behind the head, and the horses to the right, with ΑΓ. in monogram, under ΙΕΡΩΝΟΣ.; *extremely beautiful work, and as it came from the die:*

*** This is by far the most rare and interesting brass coin of our Anglo-Roman Emperor. It is most certainly worth a very high price, especially as no other specimen of this type is known in this country. It was formerly in the collection of Mr. Millingen.

After several ineffectual attempts to crush the power of Carausius, Diocletian and Maximian found it advisable, necessary, and most prudent, to acknowledge him as their colleague in the empire. The event is commemorated by the device, appropriate emblems, and legend of this coin.

KINGS OF SYRACUSE, IN SILVER.

(Continued from page 88).

729 Agathocles; [ΑΓΑΘ]ΟΚΛΕΙΟΣ. *Mionnet*, pl. 68, fig. 3; *in most perfect condition, and may be ranked among the most happy efforts of ancient Greek art:*
size $7\frac{1}{2}$. *weight* 263 *grs.* 1

730 Another: but with ΑΓΑΘΟΚΛΕΟΣ. in the exergue, and AN. in monogram in the field; *most beautiful work, and perfect preservation:* *size* 7. *weight* 264 *grs.* 1

*** This coin appears like a rival production to the preceding.

731 Another; by the same artist, but with ΑΓΑΘΟΚΛΕΟΣ. by the side of the Victory: *in lower relief, beautiful work, and condition:* *size* 6. *weight* $266\frac{7}{10}$ *grs.* 1

732 Another; with ΑΓΑΘΟΚΛΕΙΟΣ. beside the Victory; by the same artist as lot 729; *beautiful work, and fine condition:*

PENTADRACHM? OR SMALL MEDALLION, OF HIERONYMUS, IN SILVER.

735 Hieronymus; *Mionnet*, p. 337, No. 91: *Torrmuzza, Auct.* 1, tab. 9, fig. 3; but above the thunderbolt, ΑΦ.; *somewhat rubbed, and has been in circulation, but yet in good and satisfactory condition, especially when it is considered that its extraordinary rarity, almost precludes the hope of finding another:* *size* $8\frac{1}{2}$. *weight* 292 *grs.* 1

*** It is to be kept in mind, in appreciating the rarity of this medallion, and of the larger one of Hiero, lot 630, that during a period of nearly fifty years the late proprietor of these two coins could never better them, although possessing very ample means, and urged by a strong passion in favour of the regal series of Greek coins.

KINGS OF SYRACUSE, IN SILVER. (*Continued*)

736 Hieronymus; precisely the same type as lot 735, and ΑΦ. above the thunderbolt, but smaller; *extremely rare, and in very fine condition:* *size* $5\frac{1}{2}$. *weight* $129\frac{3}{10}$ *grs.* 1

737 Another; with K. (retrograde) behind the head, and KI. above the thunderbolt; *the obverse better preserved than the last, but the reverse not so good:*

size 6. *weight* $126\frac{9}{10}$ *grs.* 1

738 Philistis, Queen of Syracuse; *Mt.* pl. 68, fig. 8; with a palm branch and pendant tænia behind the head, the quadriga in slow motion, and A. near the horses' feet; *very fine work, rare, and in very perfect and beautiful condition:*

size $7\frac{1}{2}$. *weight* $217\frac{8}{10}$ *grs.* 1

*** This coin shews the whole of the head and veil, which is very uncommon.

739 Another; *but not shewing all the type in such perfection, although very fine:* *size* 7. *weight* $217\frac{3}{10}$ *grs.* 1

740 Another; with a thyrsus or sceptre? behind the head, the horses galloping, and E. under their feet; *fine work, and most perfect condition:* *size* $6\frac{1}{2}$. *weight* $208\frac{8}{10}$ *grs.* 1

741 Another; with a star behind the head, and the horses walking, and K. before them; *very fine, and in perfect preservation:*

size $7\frac{1}{2}$. *weight* 219 *grs.* 1

742 Another; see *Mionnet*, pl. 68, fig. 8; the horses in gentle motion; *perfect preservation, but of dark colour from tarnish:* *size* $6\frac{1}{2}$. *weight* $208\frac{5}{10}$ *grs.* 1

743 Another; a blade of wheat behind the head; *rev.* the horses in violent motion, with KI. before them, and an ear of wheat under their fore feet; in the field, above the car, is a crescent; *very fine work, and in perfect condition, but the face double struck:* *size* $7\frac{1}{2}$. *weight* 208 *grs.*

Philistis; *Torremuzza*, tab. 106, fig. 8; *rev.* ΒΑΣΙΛΙΣΣΑΣ. [ΦΙ]ΛΙΣΤΙ[ΔΟΣ], a Biga in gentle motion, K. before the horses; *beautiful work, and in very good preservation:*

size 4. *weight* $60\frac{8}{10}$ *grs.* 2

*** This size is of extraordinary rarity, and it is curious to remark, that it appears not to have been adjusted to the same standard as the large coins.

744 Philistis; the horses in gentle motion, same type as lot 738, but without A. under the fore feet, *good work and condition:*

size 7. *weight* $216\frac{6}{10}$ *grs.* 2

Another; the horses in violent motion; same type as lot 740, *good work and condition:* *size* $6\frac{1}{2}$.

745 Another; same type as lot 742; *fine work, fair condition: size* $6\frac{1}{2}$.

Another; *the head well preserved, but the reverse blurred by oxide: size* 7. 2

NORTHERN GREEK CITIES, IN SILVER.

(Continued from page 99).

746 Olbiopolis, in European Sarmatia; *Mionnet*, p. 349, No. 1; *in perfect condition, and of the utmost rarity: size* 6. *weight* $193\frac{9}{10}$ *grs.*

747 Callatia, in Mœsia inferior; *fine, and very rare: size* 4. *weight* $84\frac{4}{10}$ *grs.*

Istrus; *Mt.* p. 356, No. 19, *rubbed and plated: size* 4. 2

748 Another; with Δ. & XAP. in monogram under the eagle; *fine: size* $3\frac{1}{2}$. *weight* $82\frac{3}{10}$ *grs.*

Another; with Ω. under the eagle *extremely fine: size* $4\frac{1}{2}$. *weight* $101\frac{2}{10}$ *grs.* 2

CITIES OF THRACE, IN SILVER.

749 Abdera; compare *Mionnet, Supp.* pl. 5, fig. 1, for the obverse, but with a cray fish under the griffin to the left, and without letters; *rev.* in place of the square divided into four parts; there is on this coin, a male head to the left, in the inner square, and ΕΠΙ. ΣΟΛΠΑΔΟΣ. in the outer square; *extremely rare, very fine condition, and unpublished: size* 7. *weight* $224\frac{9}{10}$ *grs.* 1

750 Abdera; compare *Mt.* pl. 54, fig. 8; *obv.* ΑΒΔΗΡΙΤΕΩΝ. in two lines, Head of Apollo to the right; *rev.* ΕΠΙ • • • ΚΕΣΙΟΣ. Griffin to the left; *in very fine condition: size* 6. *weight* $176\frac{1}{10}$ *grs.* 1

751 Abdera; type of *Mt.* p. 366, No. 17, but ΕΠΙ. ΔΙΟΦΑΝΤΟΥ.; *well preserved: size* 6. *weight* $157\frac{3}{10}$ *grs.*

Abdera, *Mt. Supp.* vol. 2, pl. 5, fig. 2; but the griffin sitting, with one paw raised up; *well preserved: size* $2\frac{1}{2}$. *weight* $23\frac{7}{10}$ *grs.* 2

752 Abdera; type of *Mt.* p. 366, No. 16, but ΕΠΙ. ΕΥΡΗΣΙΠΠΟΥ.; *good condition: size* 6. *weight* $149\frac{9}{10}$ *grs.*

Abdera; type of *Mt.* p. 366, No. 18, but ΕΠΙ . . ΕΚ . . Ω . . ΜΟ: *size* 3. *weight* $38\frac{1}{10}$ *grs.*

Another; type of *Mt.* p. 366, No. 22, but the griffin is on a

club, and ΛΥΚΟ. underneath; *very rare variety, in good condition:* *size* 2½. *weight* 26$\frac{4}{10}$ *grs.* 3

753 Æneia; *obv.* helmeted Head of Æneas, with slight beard, to the left, within a dotted circle; *rev.* AINEAΣ. in a quadrangular area, surrounding an interior square divided into four parts; *extremely rare, and in very good condition:* *size* 3. *weight* 34$\frac{9}{10}$ *grs.*

*** See Millingen, Sylloge of Unedited Coins, p. 41, pl. 2, fig. 18, for the proof of this new attribution; and for the type see also Mionnet, Supp. pl. 9, fig. 7.

Æneia; *obv.* the same helmeted Head, but in more archaic style, and turned to the right; the crest of the helmet projects beyond the dotted circle surrounding the type; the beard is longer, pointed, and slightly curved upwards; the hair is long, covering the back of the neck, and done in the dotted style; the eye entire, as on ancient coins of Athens: the bottom of the neck is dotted, as if wearing a necklace; *rev.* an indented square, divided into four parts, in the style of Thrace and Macedon; *extremely rare, and in fine preservation:* *size* 3. *weight* 39$\frac{1}{10}$ *grs.* 2

*** This very curious coin is of the same denomination as the preceding, the former having evidently lost a little weight by friction. This coin being of an anterior period, the two together mutually illustrate each other, and confirm the new attribution of Millingen. There exist, in cabinets, sub-divisions of this archaic type, which should be all classed to this Town. Some persons erroneously consider them to be of Acanthus, and confuse them with those really of that city, with the helmeted head of Minerva, *rev.* indented square. But the head of the Goddess may be distinguished from that of Æneas by her round ear-ring, even when the slight beard on the head of Æneas is not perceptible.

754 Ænus; with wreath before the goat, AINION.; *Mionnet*, p. 369, No. 47; *Pellerin, Rec.* tab. 33, fig. 10; *fine work, and good condition, although somewhat rubbed; very rare:* *size* 6. *weight* 236 *grs.* 1

755 Another; with branch before the goat; *fine work; fair condition, although rubbed; very rare:* *size* 6. *weight* 226 *grs.* 1

756 Another; with star before the goat: *very rare, and fair condition, although rubbed:* *size* 6. *weight* 232$\frac{5}{10}$ *grs.* 1

757 Another; with amphora before the goat, and an astragalus under the animal; *very rare; fair condition, although rubbed:* *size* 6. *weight* 232$\frac{1}{10}$ *grs.* 1

758 Another; with an eagle before the goat; see *Combe, Brit. Mus.* tab. 4, fig. 15; *but injured by black oxide, although very little rubbed; very rare:*

size 6. *weight* $230\frac{9}{10}$ *grs.*

Ænus; *Mionnet*, p. 369, No. 49; AINION.; see *Dumersan, Coll. Allier*, pl. 3, fig. 3; *very rare type, and in very good condition:* *size* $3\frac{1}{2}$. *weight* $55\frac{5}{10}$ *grs.*

Ænus; AIN. *Mionnet*, p. 369, No. 43; compare *Dumersan, Coll. Allier*, tab. 3, fig. 4; but the head of Mercury to the right, and a club before the goat; *rare, and fine:*

size $1\frac{1}{2}$. *weight* $19\frac{4}{10}$ *grs.* 3

(Greek Cities, in Silver, continued at page 116.*)*

LYSIMACHUS, KING OF THRACE, IN GOLD.

759 Lysimachus; size and type of *Mionnet*, pl. 69, fig. 7, and *Supp.* pl. 8, fig. 7; but with a Π. and an uncertain symbol in the field; *in very fine condition, (false):*

size $8\frac{1}{2}$. *weight* $539\frac{8}{10}$ *grs.* 1

*** This coin is a very good specimen of the work of the earliest falsifiers, being about three centuries old. Others are to be found in the earliest extant cabinets, as the Florentine, the Pembroke, &c.

DIDRACHMS OF LYSIMACHUS, IN GOLD.

760 Lysimachus; usual type, *Mionnet*, p. 438, No. 4; but in the field, near the feet of Minerva, a lion's head in profile, to the left; *very beautiful work, and in the state in which it came from the die:* *size* $4\frac{1}{2}$. *weight* $132\frac{2}{10}$ *grs.* 1

*** This type is probably not the earliest struck by Lysimachus. His first coinage of gold, like his earliest coinage of silver, seems to have been a continuation, or rather an adoption of the type of Alexander the Great. See a most rare specimen published by Mionnet, pl. 69, fig. 6.

761 Another; with a monogram in the field, under the extended hand of Minerva; *fine work, and in most exquisite preservation:* *size* $4\frac{1}{2}$. *weight* $131\frac{6}{10}$ *grs.* 1

762 Another; with a monogram on the throne of Minerva; *beautiful work, and in the highest preservation:*

size $4\frac{1}{2}$. *weight* $131\frac{3}{10}$ *grs.* 1

763 Another; with a monogram under the extended hand of Minerva, *beautiful work, and fine condition:*

size 4. *weight* $131\frac{8}{10}$ *grs.* 1

764 Another; with AP. in monogram over a bee in the field, near the feet of Minerva, and EM. in monogram in the exergue; *fine work, and fine preservation: size* 4. *wt.* 132 *grs.* 1

765 Another; with a trident and two dolphins in the exergue, a monogram in the field, under the extended hand of Minerva, and BY. on the throne; *the work good, but not quite so fine; the preservation is perfect: size* $4\frac{1}{2}$. *wt.* $130\frac{6}{10}$ *grs.* 1

*** This coin was evidently struck at Byzantium.

766 Another; with a lion's head in profile, and a monogram under the extended hand of Minerva, and a monogram also in the exergue; *good work, and very fine preservation, but has been clipped behind the head: size* $4\frac{1}{2}$. 1

860 Thasus; like fig. 3, of the plate of Coins of Thasus, *Mionnet, Supp.* p. 545; in the field is the letter Λ. very clear, not A.; *very fine work, and very good condition. This style of work, on these coins, is of the utmost rarity:*

size $5\frac{1}{2}$. *weight* $133\frac{9}{10}$ *grs.*

Another; but of a style of work also uncommon, from its rudeness; *very well preserved: size* 5. *wt.* $142\frac{4}{10}$ *grs.* 2

861 Another; different style; *Hunter*, tab. 33, fig. 1; *fair condition:* . . *size* $5\frac{1}{2}$.

Thasus; (*rev.* Hercules, with bow and arrow, on one knee, in a square); type of *Mt. Supp.* pl. 8, fig. 6, but a head in the field, instead of grapes; *fine condition, and fine old work:*

size 3. *weight* $57\frac{8}{10}$ *grs.*

Thasus; *Hunter*, tab. 33, fig. 2; bearded old Faun kneeling on one knee; *fine:* *size* $1\frac{1}{2}$. *weight* $57\frac{8}{10}$ *grs.* 3

TETRADRACHMS OF LYSIMACHUS, KING OF THRACE, IN SILVER.

862 Lysimachus; *obv.* Head of Hercules, covered with the skin of the lion's head, to the right; *rev.* ΒΑΣΙΛΕΩΣ. ΛΥΣΙΜΑΧΟΥ. Jupiter Aetophorus sitting, to the left; in the field, the fore half a lion, and a crescent; under the throne, the representation called a pentagon; *in perfect condition, very good work, and of the utmost degree of rarity:*

size $7\frac{1}{2}$. *weight* $263\frac{2}{10}$ *grs.* 1

*** The tetradrachms and drachms of this type are probably specimens of the first coinage of Lysimachus, being evidently adopted in continuance of the silver coinage of Alexander the Great. These tetradrachms are of the utmost rarity. The drachms are more common. Both denominations are always adjusted to the Attic Talent, like the coins of Alexander.

863 Another; but with the same legend differently disposed, the word ΛΥΣΙΜΑΧΟΥ. being now in the exergue; in the field, the fore half of a lion under a monogram within a wreath; and under the throne another monogram; *different style of work from the last; of the utmost rarity, and in very good condition:* . *size* $7\frac{1}{2}$. *weight* $260\frac{8}{10}$ *grs.* 1

TETRADRACHMS OF LYSIMACHUS, IN SILVER.

USUAL TYPE.

*** These coins of Lysimachus have been selected during so many years by their late possessor with much numismatic taste and feeling. They are all different, and the variations in the type offer many most interesting subjects of inquiry.

864 Lysimachus; usual type; *obv.* Portrait, with ram's horn; *rev.* Minerva sitting; *Mionnet, Supp.* pl. 8, fig. 7; but with the same monogram as on the preceding, within a wreath, in the field before the Minerva: *size* $8\frac{1}{2}$. *weight* 265 *grs.* 1

*** This most beautiful coin is very remarkable for the extreme boldness of the relief, the very high character of the workmanship, and the fine state of preservation. It probably gives us one of the most faithful portraits extant of Alexander the Great in his youth.

865 Another; with monogram above the arm of Minerva, and a meander in front of her beyond the legend; the portrait of Alexander much older. The form of the front of the throne (being straight) is very peculiar and unusual; *beautiful work, and high condition:* *size* $7\frac{1}{2}$. *weight* $266\frac{7}{10}$ *grs.* 1

866 Another; with a torch in the field, in front of Minerva, and a star on the throne, the front of which is covered with the drapery of Minerva, *whose figure is very beautiful, and highly preserved, as well as the obverse:*
size 8. *weight* $261\frac{3}{10}$ *grs.* 1

*** The drapery of the Minerva on the usual type of these coins never covers the front of the throne.

867 Another; with a monogram under the hand of Minerva, another behind her beyond the legend, and another in the exergue; *fine work, and perfect preservation on both sides:*
size 8. *weight* $264\frac{8}{10}$ *grs.* 1

868 Another; with a monogram under the hand, and crescent in the exergue; the point of the spear, at the feet of Minerva, very well defined; *fine work and condition on both sides:*
size 8. *weight* $263\frac{1}{10}$ *grs.* 1

869 Another; with different style of portrait, and a peculiarity in the horn; on the reverse, the front of the throne is straight; with a most singular and uncommon monogram under the hand, and a meander in front of Minerva beyond the legend; *fine condition, and fine work on both sides:*
size $8\frac{1}{2}$. *weight* $265\frac{8}{10}$ *grs.* 1

870 Another: with a monogram under the hand of Minerva; *fine work, and beautiful condition on both sides:*
size $8\frac{1}{2}$. *weight* 264 *grs.* 1

871 Another; different character of head, and style of work; with a lion's head, in profile, under the hand of Minerva, and a monogram on the throne; the spear has no point; *highly preserved, particularly the reverse:*
size 9. *weight* $262\frac{3}{10}$ *grs.* 1

872 Another; with a monogram under the hand of Minerva, and ΔΩ. on the throne; *in very good preservation on both sides:*
size 8. *weight* 260 *grs.* 1

*** This coin proves the reading of the monogram, on the preceding, to be ΔΩ.

873 Another; fine character of head; with an elephant and a lion's head, in profile, under the hand of Minerva; ΘE (in monogram) upon the throne; *fine condition, and work:*
size $8\frac{1}{2}$. *weight* $259\frac{8}{10}$ *grs.* 1

874 Another; with a caduceus under the hand of Minerva, and a bee in the field, behind her, beyond the legend; *fine character of head, and well preserved on both sides:*
size 9. *weight* $263\frac{3}{10}$ *grs.* 1

*** This coin was formerly in the Modena Cabinet, and bears the small golden stamp of the spread eagle.

875 Another; fine character of head, with a monogram under the hand of Minerva, and a terminus in front, beyond the legend; *in very good condition, and a fine spread coin:*
size 9. *weight* $260\frac{7}{10}$ *grs.* 1

(Tetradrachms of Lysimachus, Continued at page 130*).*

DRACHMS OF LYSIMACHUS, IN SILVER.

876 Lysimachus; same type as the preceding (a Drachm); *fine and rare:* . *size* 4. *weight* $63\frac{7}{10}$ *grs.*

Lysimachus; but type of Alexander the Great, (a Drachm) in the field of the reverse is a crescent under a half lion; under the throne is the representation called a pentagon; *fine and rare:* . *size* 4. *weight* $67\frac{1}{10}$ *grs.* 2

*** The weight of this coin is remarkable, as it is very rare to find an Attic Drachm so heavy.

KINGS OF PÆONIA, IN SILVER.

877 Audoleon; usual type, *Mionnet*, p. 450, No. 2, but with the full face inclining to the left; *of very uncommon style of work and fabric, and as it came from the die; probably unique:* . *size* 6. *weight* 199$\frac{5}{10}$ *grs.* 1

878 Another; but with the full face (as usual) inclining to the right; under the horse AY. in monogram; *very rare, and in extremely fine condition: size* 6. *weight* 193$\frac{4}{10}$ *grs.* 1

879 Another; with same monogram under the horse; *in very fine condition, and rare: size* 6. *weight* 195$\frac{6}{10}$ *grs.* 1

880 Audoleon; same type, and monogram under the horse; *very fine, and of extreme rarity: size* 3. *weight* 46$\frac{4}{10}$ *grs.* 1

*** This type appears to be unpublished, it being usually only a half horse.

881 Patraus; *Mionnet*, p. 451, No. 9; but with a helmet in the field; *good work, in most beautiful condition, and rare: size* 6$\frac{1}{2}$. *weight* 196$\frac{2}{10}$ *grs.* 1

*** This coin is remarkably distinguished for the unusually ornamented dress and trappings of the horse and rider, as well as of the fallen enemy.

882 Another; but not having the legend retrograde, and without the peculiarities of the preceding coin; in the field, a monogram; *fine condition: size* 6. *weight* 193$\frac{8}{10}$ *grs.* 1

883 Alexander; *obv.* Female Head, with flowing hair and wreath of laurel, seen nearly full faced, inclining to the right, with earrings and necklace, and the hair ornamented with pearls in front; by the side of the head is an uncertain object; *rev.* ΑΛΕΞΑ[ΝΔ]ΡΟΥ., Horseman in armour, and with a lance, as on the preceding coin; under the horse is a double axe; *good work, and fine condition; presumed to be unique and unpublished: size* 6. *weight* 183$\frac{4}{10}$ *grs.* 1

*** The type and style of work, as well as the weight and the style of minting, of this remarkable coin, lead to the opinion that it belongs to a King of this dynasty, named Alexander; but which must however be proved by future research. The object called uncertain in the above description, is a sort of sceptre, ending with a ball, from which issue sprigs of palm. See the note following lot 1021.

*** The style of this bust of Diana is different from that on the coins inscribed MAKEΔONΩN. ΠPΩTHΣ.

(Gold Didrachms of Philip, continued at page 148*)*

KINGS OF MACEDON, IN SILVER. *(Continued.)*

1014 Philip II.; type of *Mionnet*, pl. 70, fig. 2; *obv.* Head of Jupiter to the right, of youthful character, laurel'd, and bearded; *rev.* ΦΙΛΙΠΠΟΥ., naked Youth with long hair, holding a palm branch, on a horse trotting to the right, without any symbol in the field; *of great rarity in such very perfect condition, and of such unusually fine work:* *size* 7. *weight* $221\frac{8}{10}$ *grs.* 1

*** It is rather the ends of the fillet, which float behind the head of the youth like long hair; see the note at the end of lot 1021.

1015 Another; older character of Jupiter, with a thunderbolt placed perpendicularly under the horse, and N. in the exergue; *a very fine coin, particularly the reverse, and very well preserved:* *size* $6\frac{1}{2}$. *weight* $217\frac{5}{10}$ *grs.* 1

*** On this coin, the ends of the fillet fall down on the neck of the youth.

1016 Another; with a diota under the horse; *a very fine and well preserved coin: size* $6\frac{3}{4}$. *weight* $221\frac{3}{10}$ *grs.* 1

1017 Another; but with the Head of Jupiter to the left, and Θ under the horse; *very good work and condition on the obverse, but the reverse fine: size* 6. *wt.* $219\frac{7}{10}$ *grs.* 1

*** These coins are extremely rare, with the head of Jupiter to the left. There is only one in this collection, and according to Mionnet, the French collection does not possess one.

1018 Another; but, as usual, with the head of Jupiter to the right; under the horse is a thunderbolt, placed horizontally, and an N. in the exergue; *very fair condition: size* 7. *weight* $218\frac{2}{10}$ *grs.*

Philip II.; *obv.* same as the last; *rev.* ΦΙΛΙΠΠΟΥ., Horseman with the chlamys, pænula, and causia, and right arm uplifted, trotting to the left; between the fore legs of the horse is a bow, and under him, half a winged sea horse; *this type is by far more rare than the preceding, and although somewhat rubbed, is in very good condition: size* 6. *weight* $219\frac{6}{10}$ *grs.* 2

1019 Another; but with M. between the fore legs of the horse, and a trident under him; *rubbed, but in fair condition: size* $6\frac{1}{2}$.

Philip II.; *obv.* as usual, Head of Jupiter to the right; *rev.* as usual, naked Youth, with palm, to the right, but with a thunderbolt placed horizontally under the horse, and Σ. between the fore legs; *in very fair condition: size* 7. 2

1020 Another; with the same symbol and Π. under the horse, and between the fore legs, ME. in monogram; *in extremely good condition: size* $6\frac{1}{4}$. *weight* $217\frac{5}{10}$ *grs.*

*** On this coin the floating ends of the fillet are tied in a knot behind the head.

Philip II? *obv.* Male Head to the right, with short hair, and very narrow fillet; *rev.* ΦΙΛΙΠΠΟΥ., Horseman galloping to the left; under the horse is a club; *well preserved: size* 3. *weight* 37 *grs.* 2

*** The style of work seems to shew this, and similar, coins, to be posterior to the time of Philip II.; but many of the coins of the Kings of Macedon require a new and comprehensive arrangement.

1021 Another; with a pellet under the horse; *well preserved: size* 3. *weight* $39\frac{3}{10}$ *grs.*

Another; with a thunderbolt under the horse; *finer work, older style, and thicker; well preserved:*
size $2\frac{1}{2}$. *weight* $42\frac{5}{10}$ *grs.*

*** This coin appears to be of the time of Philip II.

Philip II.; type of lot 1014, but with the prow of a galley between the fore legs of the horse; *very fair condition:*
size $6\frac{1}{2}$. *weight* $219\frac{9}{10}$ *grs.* 3

*** This coin is remarkable for shewing, very distinctly, that the object which sometimes appears like the long hair of the naked youth, and assumes many other appearances, is clearly seen to be the fillet (of Victory) on his head, with the ends floating behind. This fillet is frequently seen, on other coins, attached to a palm branch, which, on these coins, the youth holds in his hand. On this identical coin the youth holds a sort of sceptre, ending with a ball, from which issue the sprigs of palm. See a repetition of this very rare representation on the unique coin lot 883.

(Kings of Macedon in Silver, continued at page 149.)

TETRADRACHMS OF ALEXANDER THE GREAT. IN GOLD.

1022 Alexander III.; usual type; *obv.* Head of Minerva to the right, with a serpent on her helmet, and wearing ear-rings and necklace, the hair perceptible through the visor of the helmet; *rev.* ΑΛΕΞΑΝΔΡΟΥ., Victory standing to the left, draped, and with wings expanded, holding a wreath in her extended right hand, and a vexillum with a short handle in her left; in the field, a diota; *extremely rare, and in very fine condition:* *size* $5\frac{1}{2}$. *weight* $265\frac{5}{10}$ *grs.* 1

1023 Another; but with A. and a thunderbolt perpendicularly placed in the field; *extremely rare, a little rubbed, but in very good condition:* *size* 5. *weight* $264\frac{9}{10}$ *grs.* 1

*** The Gold Tetradrachms of Alexander having evidently been in circulation, are most rarely to be found free from a slight rubbing, occasioned by the weight of the coin, and the extreme purity of the gold.

size 4. *weight* $132\frac{3}{10}$ *grs.* 1

*** On this coin the handle of the vexillum is short.

1026 Another; with a trident in the field; *extremely fine condition:* *size* 4. *weight* 133 *grs.* 1

1027 Another; with the hair of Minerva in a different style, and a thunderbolt under the neck; on the reverse there is a monogram in the field, and the Victory holds a vexillum, very well defined, with long staff or handle touching the ground, and differently formed in the upper part; the legend unusually minute, and the work fine; *in very excellent condition:* *size* 4. *weight* $132\frac{2}{10}$ *grs.* 1

*** These peculiarities render this coin extremely rare and curious.

size 4. *weight* $132\frac{2}{10}$ *grs.* 1

1030 Another; with monogram and double axe in the field; *as it came from the die, but the die slightly used:*

size 4. *weight* $131\frac{1}{10}$ *grs.* 1

1031 Another; with the letter A., a monogram, and a half horse, with curled wings, in the field; *as it came from the die:*

*** Struck at Chios Insula, on the coins of which the Sphinx always occurs.

1241 Another; with MI. in monogram, and lion looking back at a star, under the eagle; behind the throne, two monograms;

extremely rare, rubbed, but in very fair condition:
size 9. *weight* $260\frac{6}{10}$ *grs.* 1

DIDRACHMS OF ALEXANDER THE GREAT, IN GOLD,

With the title of ΒΑΣΙΛΕΩΣ., *and a Serpent on the Helmet.*

(Continued from page 156*).*

1247 Alexander III.; usual type; see *Mionnet*, pl. 70, fig. 3, with M. behind the head of Minerva, her hair visible through

the visor of the helmet; on the reverse ΛΥ. in the field to the left, and more movement than usual in the Victory; *fine work, and very fine condition: size* 4. *wt.* $132\frac{7}{10}$ *grs.* 1

1248 Another; with the head of an old faun in the field to the left, and a monogram to the right; *very rare symbol, fine work and condition: size* 4. *weight* $131\frac{6}{10}$ *grs.*

1249 Another; with MI. in the field to the left, and a monogram to the right; *good work, and fine condition: size* 4. *weight* $132\frac{2}{10}$ *grs.* 1

1250 Another; with AP. in monogram in the field, and more movement than usual in the Victory; *fine work, and very fine condition: size* 4. *weight* $132\frac{4}{10}$ *grs.* 1

1251 Another; with monogram in the field to the left, and MI. to the right; the letters BA. (of Βασιλεως) much larger than the rest; the vexillum looking much like a trident, and with long staff; *fine work, and very good condition: size* 4. *weight* $132\frac{5}{10}$ *grs.* 1

*** Mionnet, in his *Corps d'Ouvrage,* falls into the mistake of calling the vexillum a trident.

ML 1252 Another; with a torch in the field to the left, and A. to the right; *good work, but rather rubbed: size* 4. *weight* $131\frac{2}{10}$ *grs.*

HEMIDRACHMS, IN GOLD, *with a Serpent on the Helmet.*

Alexander III.; *obv.* helmeted Head of Minerva to the right; *rev.* ΑΛΕΞΑΝΔΡΟΥ., a bow and club in the field; above is a diota; *very well preserved: size* $1\frac{1}{2}$. *weight* $32\frac{8}{10}$ *grs.*

Another; with the letters differently disposed, and a thunderbolt in the field above: *fair condition: size* $1\frac{1}{2}$. *weight* $32\frac{5}{10}$ *grs.*

Alexander III.; *Drachm, in Gold, with a Griffin on the helmet; obv.* helmeted Head of Minerva to the right; *rev.* ΑΛΕΞΑΝΔΡΟΥ., a winged Victory, as usual, but turned to the *right;* in the field to the right, is a wheel, and the letter Λ.; *fine work and condition, and of the utmost degree of rarity, if true: size* $2\frac{1}{4}$. *weight* $53\frac{4}{10}$ *grs.* 4

*** The variation in the position of the legend, and of the Victory, adds considerably to the rarity of this coin, if its authenticity could be relied on. According to Mionnet there appears not to be a gold drachm of Alexander in the French cabinet.

KINGS OF MACEDON, IN SILVER. *(Continued).*

1253 Demetrius I.; *Mionnet*, p. 579, No. 841; type of pl. 70, fig. 10; with a monogram on each side the Neptune, within the legend; *very fine work, and in good condition:*
size 8. *weight* 264$\frac{4}{10}$ *grs.* 1

1254 Another; with the relative position of BAΣIΛEΩΣ. and ΔHMHTPIOY. transposed; and a monogram on each side, beyond the legend; *fine work, rubbed, but in fair condition:* *size* 8$\frac{1}{2}$. *weight* 260 *grs.* 1

1255 Another; but with the position of the legend as usual; a monogram on each side the Neptune, within the legend; *extremely fine work, the Neptune very good, and on the whole a very fair specimen, but a little injured by oxide:*
size 8$\frac{1}{2}$. 1

1256 Another; with only one monogram beyond the legend in front of Neptune, and having a different style of portrait; *good work, and very fair condition:*
size 7$\frac{1}{2}$. *weight* 256$\frac{5}{10}$ *grs.*

Another; *with the portrait in as good a style of work and condition as any of the preceding, if not superior, but the reverse nearly destroyed by oxide:* *size* 8$\frac{1}{2}$. 2

2257 Antigonus I. (Gonatas); *Mionnet*, p. 581, No. 851; *an extremely fine specimen, in the highest condition:*

size 9. *weight* 265$\frac{2}{10}$ *grs.* 1

size 9$\frac{1}{2}$. *weight* 262 *grs.* 2

*** Mionnet describes this coin as presenting us with a portrait of Philip, but it is evidently the head of the hero Perseus, whose helmet, or head covering, is formed of the skin of an eagle, as that of Hercules is formed of the skin of the lion of Nemea.

1260 Another; but the head of the hero Perseus on the Macedonian buckler is to the right; on the reverse, the wreath has acorns intermingled with the oak leaves, and ME. in a monogram; *an extremely fine and perfect coin, of the utmost rarity, especially with the head to the right:*
size 9. *weight* 263$\frac{1}{10}$ *grs.* 1

1261 Philip V.; (with his portrait); *Mt.* p. 585, No. 892; but with three different monograms, and a trident, outside the wreath; *slightly rubbed, but a very perfect specimen, and of extreme rarity:* *size* $6\frac{1}{4}$. *weight* 129 *grs.* 1

*** Mionnet seems unaware of the true rarity of this coin.

1262 Philip V.; (with his portrait); same type, but with three different monograms; *in most perfect condition, and extremely rare:* *size* $4\frac{1}{2}$. *weight* $62\frac{3}{10}$ *grs.*

Philip V.; (with his portrait); same type, but with three different monograms; *rather rubbed, but a very excellent specimen of this size, which is still more rare than either of the two preceding, and which, according to Mionnet, does not exist in the French collection:*

size $2\frac{3}{4}$. *weight* $28\frac{1}{10}$ *grs.* 1

1263 Perseus; (with the artist's name, ΠΩΙΛΟΥ.); *Mt. Supp.* p. 257, No. 689; see pl. 11, fig. 4; acorns are intermingled with the oak leaves in the wreath surrounding the eagle; and there is a star in the field, outside; *extremely fine style of portrait, on a large spread coin, in the highest state of preservation, and of the utmost rarity:*

size $9\frac{1}{2}$. *weight* $259\frac{6}{10}$ *grs.* 1

1264 Another; same type, but without ΠΩΙΛΟΥ., and the wreath of oak has no acorns; in the field are three monograms, and a plough beyond the wreath; *extremely fine work, in the highest possible condition, and a most noble specimen of this most rare coin:* *size* $9\frac{1}{2}$. *weight* $260\frac{9}{10}$ *grs.* 1

1265 Another; with ΣΑ. (in monogram) between the legs of the eagle, and two others in the field; a star beyond the wreath; *in the same perfect state, and the same beautiful style of portrait; extremely rare:* *size* $9\frac{1}{2}$, *wt.* $261\frac{5}{10}$ *grs.* 1

1266 Another; with ΔΙ. (in monogram) between the legs of the eagle, and two others in the field; a star beyond the wreath; *equal to the last in work and condition, as well as rarity:* *size* 9. *weight* $264\frac{5}{10}$ *grs.* 1

1267 Another; with ΕΥ. (in monogram) between the legs of the eagle, and ΕΟ. (in monogram) in front, and another above; a plough in the field beyond the wreath; *same fine work and condition, as nearly as possible:*

size $9\frac{1}{2}$. *weight* $260\frac{2}{10}$ *grs.* 1

1268 Another; with ΔΩ. (in monogram) between the legs of the eagle, and AY. (in monogram) in front; another monogram above; a plough in the field beyond the wreath; *good work, and very well preserved:*

size 9. *weight* $233\frac{4}{10}$ *grs.* 1

*** The weight of this coin is difficult to account for, except it be an ancient forgery.

1269 Another; with Φ between the legs of the eagle, and two monograms in the field; a plough beyond the wreath; *in very good condition, and a very fair coin:*

size $9\frac{1}{4}$. *weight* $247\frac{2}{10}$ *grs.* 1

1272 Another; with ΦΙΛΙΠΠΟΥ. ΒΑΣΙΛΕΩΣ., and near the feet of the Victory, AY. on one side, and M. on the other; *fine work, very rare, and in extremely perfect condition:*

*** The attribution of this coin to Pheræ, in Bœotia, by Sestini, as quoted by Mionnet, Supp. vol. 3, p. 517, No. 85, does not appear admissible. It is more probably a Thessalian coin, and the difficulty ocassioned by the letters TA. must remain for future solution.

ΛΥΣΙΜΑΧΟΣ.; a small Female Head, in the field above the galley, and a monogram below; at the prow of the galley is the head of a lion; *a very well preserved and fine specimen of this rare type:* *size* 5. *weight* $128\frac{5}{10}$ *grs.* 1

*** Solium is a new town in numismatic geography. It is mentioned by Thucydides, book 2, as belonging to the Corinthians, which accounts very satisfactorily for the type of the pegasus. Stephanus, quoting Thucydides, calls the town Sollium; and both writers spell the name with O instead of Ω. Other similar errors of the copyists occur in Thucydides, which are corrected by the coins. There is a similar coin of this town in the British Museum, from the cabinet of Mr. Burgon. Coins being the best commentators on coins, it appears probable that, that of Pyrrhus in copper, with ΦΘΙΑΣ, furnishes us with a clue to the name of the deified personage represented on this coin of Solium, as well as on those of Ambracia. The veiled female Head, laureate, on the coins of Pyrrhus, Ambracia, and Solium, appear to be identical.

Thyrreum; Pegasus type; *well preserved; three different:* *size* 5.

Uncertain; Pegasus type, without letters or symbols under the Pegasus; *five different; well preserved, some rare: size* 5. 9

COINS OF ÆTOLIA, IN SILVER.

1395 Ætolia; type of *Mionnet, Supp.* pl. 15, fig. 3, and p. 87, No. 2; but with a monogram, and ΣE. in the field; *extremely rare, and in very fine condition: size* 7. *weight* $269\frac{2}{10}$ *grs.* 1

*** Mionnet says: "Homme à droit," &c.; but it is rather a female habited in a short tunic or hunting dress, like Diana; and probably represents Ætolia, the province personified. See Millingen, Recueil, &c. p. 39, where this type is fully explained. There is little doubt that the representation on this coin is copied from the statue and trophy which the Ætolians dedicated at Delphi; see Pausanias, Phocica, cap. 18, et seq. The crow and tripod on the gold coin of Ætolia, engraved in Mionnet, Supp., plate 15, fig. 1, seems further to connect this type with Apollo, or Delphi.

1396 Ætolia; *Mionnet*, p. 87, No. 5; *middling condition, but very rare: size* 7.

Ætolia; type of *Mt.* No. 6, p. 87; but EY. and AP. (in monogram) on the reverse; *fair condition: size* 3. 2

1397 Ætolia; like *Mt. Supp.* p. 477, No. 12; but with ΦI. behind the Diana? whose head is ornamented with a wreath of laurel and turned to the right; on the reverse the figure is a female, not covered with an ægis, but wearing a short tunic and covered with a mantle wrapped round the left arm; the left hand resting on a parazonium. The head of the female is seen full face, and is ornamented with a wreath the leaves of which project on each side of the face. In the field is a trophy, and above it a large Δ.; *a very beautiful and clean coin in the highest state of preservation, and of the utmost degree of rarity: size* $4\frac{3}{4}$. *weight* $82\frac{8}{10}$ *grs.* 1

Phocis; ΦΟΚΙ., two, usual types; Female Heads, in indented squares, archaic style; *very well preserved:* *size* 3.

Phocis; ΦΟ.; *Mt.* p. 94, No. 2; three different: *size* $1\frac{1}{2}$. 8

1403 Delphi; compare *Mt. Supp.* p. 497, No. 27. For the type, see pl. 5, fig. 4, *De Bosset, Méd. de Céphalonie, &c., Lond.* 1815, 4to.; *obv.* Negro's Head to the left; *rev.* ΔΑ. Goat's Head, seen in front, in an indented square; *of most extreme rarity, and in perfect preservation:*
size 1. *weight* $9\frac{9}{10}$ *grs.* 1

*** Having the letters ΔΑ. this coin is probably unique.

Delphi; *Mt. Supp.* p. 497, No. 30; *De Bosset,* pl. 5, fig. 1; ΔΑΛ.; *of extreme rarity, and in very good condition:*
size 2. *weight* $18\frac{3}{10}$ *grs.*

Delphi; *Mt. Supp.* p. 497, No. 29; *De Bosset*, pl. 5, fig. 2; *incrusted with oxide; very rare:* *size* 2.

Another; with the dolphins differently disposed; *fair condition:* . . *size* 2. 4

*** Opportunities of obtaining the two former very rare types, of such a rare town as Delphi, very seldom occur.

CITIES OF BŒOTIA, IN SILVER.

1404 Bœotia, *in genere;* *obv.* Bœotian Buckler; *rev.* BOI. between the spokes of a wheel; *extremely rare:*
size 4. *weight* $187\frac{2}{10}$ *grs.*

Bœotia; *obv.* Buckler; *rev.* BOIΩ., Vase, and a bunch of Grapes, in the field above; *in fine condition:*
size $5\frac{1}{2}$. *weight* $190\frac{6}{10}$ *grs.*

Bœotia; *obv.* Buckler; *rev.* B. in an indented square; *rare:*
size $\frac{3}{4}$. *weight* $14\frac{1}{10}$ *grs.*

Bœotia; usual type; *rubbed:* . *size* $2\frac{1}{2}$. 4

1405 Bœotia; *obv.* Bœotian Buckler, with T. on one side, and A. (of archaic form) on the other, within the hollows on each side of the buckler; *rev.* a Wheel, but without any letters; *a very thick and old coin, in very good condition:*
size 4. *weight* 184 *grs.*

*** This coin cannot with safety be classed to Tanagra, as it is possible that the objects, like letters, within the hollows of the buckler, may be something placed there for the defence of the wearer.

Bœotia; *obv.* Buckler; *rev.* four deep triangular indentations; *well preserved, old and thick coin:*
size $2\frac{1}{2}$. *weight* $93\frac{5}{10}$ *grs.*

*** This coin, also, appears to have an object like the letter Π, on each side, within the hollow; possibly it is intended to prevent the passage of a spear, or sword, through that part of the buckler.

Another; smaller; *well preserved:*
size $1\frac{3}{4}$. *weight* $41\frac{6}{10}$ *grs.*

*** This coin, also, appears to have an object like the letter T, within the hollow on each side of the buckler.

Bœotia; *obv.* Buckler; *rev.* APKA., Vase, the handles entwined with ivy leaves; *well preserved:* *size* $5\frac{1}{2}$. 4

1406 Bœotia; *obv.* Buckler; *rev.* BOIΩ., Vase with two handles; and a bow in the field above it; *exquisite preservation:*
size 7, *elongated.* *weight* $188\frac{1}{10}$ *grs.*

Bœotia; *obv.* Buckler; *rev.* four deep triangular indentations; *well preserved:* *size* 3. *weight* $93\frac{3}{10}$ *grs.* 2

1407 Another; *well preserved:* *size* 3. *weight* 92 *grs.*

Bœotia; *obv.* Buckler; *rev.* BOIΩ., Vase with two handles, and a bunch of grapes in the field above; *in perfect condition:* *size* $6\frac{1}{4}$. *weight* $190\frac{3}{10}$ *grs.* 2

1408 Bœotia; type of *Hunter*, tab. 13, fig. 11; *rev.* Victory standing; *Mionnet*, No. 60, p. 103; but with monogram, and a trident in the field; *as it came from the die, but the die rather used; rare:* *size* 4. *weight* $75\frac{2}{10}$ *grs.*

Bœotia; type of *Hunter*, tab. 13, fig. 10; *rev.* Neptune standing; type of *Mt. Supp.* No. 27, p. 505; in the field, a monogram and uncertain symbol; *very rare, and in most perfect condition:* *size* 4. *weight* $78\frac{3}{10}$ *grs.* 2

*** It is most difficult to procure a specimen of this type in a tolerable state of preservation.

1409 Coronea; *obv.* Buckler; *rev.* KO., Head of Medusa, full face, within a circular indentation; *well preserved, and of extreme rarity:* *size* $1\frac{1}{2}$. *weight* $13\frac{2}{10}$ *grs.*

Coronea, or Copæ; *obv.* Buckler; *rev.* ♀. in an indented square; *well preserved and rare:* *size* $\frac{1}{2}$. *weight* $13\frac{9}{10}$ *grs.* 2

1410 Coronea; *Mt.* p. 113, No. 15; *extremely rare, and in very good condition:* *size* 6. *weight* $260\frac{5}{10}$ *grs.* 1

*** This coin is frequently confused with those of Neapolis in Macedonia.

1411 Dionysia; *obv.* Buckler; *rev.* ΔI., Vase with two handles within a circular indentation; *well preserved, and presumed to be unpublished of this weight:* *size* $5\frac{1}{2}$. *weight* $186\frac{3}{10}$ *grs.* 1

*** It is to M. Dumersan that numismatists are indebted for this new classification; see his Descrip. Méd. Ant. Cab. Allier de Hauteroche, p. 45, where he quotes Ortelius, Thesaurus Geographicus, 4to., 1611, and Diodor. Sic. lib. IV. This attribution appears by far preferable to the forced reading of ΔI. for ΔH., or ΔE., in classing these coins to the town of Delium, according to the suggestion of Sestini.

1412 Another; ΔI.; *Mionnet, Supp.* p. 512, No. 56, pl. 16, fig. 5; *extremely rare, and well preserved:* *size* 4. *weight* $83\frac{2}{10}$ *grs.*

Another; but smaller; *very rare:* *size* $2\frac{1}{2}$. *weight* $38\frac{7}{10}$ *grs.* 2

*** There is some little doubt as to the letters being ΔI. on this last coin, in consequence of the silver having become oxidized, and the

letters brittle; but this type being found with its regular sub-divisions, seems to confirm, very satisfactorily, the attribution of these coins to a town in Bœotia beginning with ΔΙ., and not to regard the letters as the initials of the name of a magistrate, as generally done.

1413 Orchomenus; EPXO.; *Mt. Supp.* p. 516, No. 78, and pl. 16, fig. 9; *Hunter*, tab. 13, fig. 12; *in the finest condition, and of the utmost rarity:*

size $5\frac{1}{2}$. *weight* $189\frac{5}{10}$ *grs.* 1

*** Combe, page 68, in describing a similar coin in the Hunter collection, considered the letters as indicative of the name of a magistrate; but modern discoveries leave no doubt of the correctness of this attribution.

1414 Orchomenus; see *Pellerin, Rec.* pl. 103, fig. 3, and *Mt.* vol. 3, p. 36, No. 29; *generally ascribed to Eresus, in Lesbos*, or Eretria, in Eubœa; *very rare, and in very good condition:* *size* 3. *weight* $41\frac{1}{10}$ *grs.*

*** This coin may be classed with certainty to Orchomenus, in Bœotia. Its rarity, in silver, has prevented very numerous observations as to the place where it is found, and has therefore tended to impede its correct classification; but the constant finding in Bœotia of coins in copper, with various modifications of the same type and legends, and often with EP. instead of the monogram, (like Hunter, tab. 26, fig. 22), proves, not only how the monogram is to be read, but, at the same time, leads to the certain classification of all these coins to Orchomenus. In the Orchomenian inscriptions in the British Museum, the name of this town is always written, EPXOMENIΩN.

Orchomenus; *obv.* Horse galloping to the right; *rev.* ER. (retrograde) three grains of Wheat, placed side by side; *extremely rare, but in bad condition:* *size* $1\frac{1}{4}$.

Mycalessus; *Mt.* p. 106, No. 78; MY.; *very rare, and very well preserved:* *size* 2. *wt.* $13\frac{1}{10}$ *grs.* 3

1415 Another; *very well preserved: size* $1\frac{1}{2}$. *weight* 12 *grs.*

Pharæ; *Mt.* p. 107, No. 81; *very rare, and very well preserved:* *size* $1\frac{1}{2}$. *weight* $13\frac{1}{10}$ *grs.*

Platææ; *Mt.* p. 107, No. 82; *extremely rare, and well preserved, but somewhat rubbed:* *size* 3. *wt.* $39\frac{3}{10}$ *grs.*

Tanagra; TA., usual type; *well preserved:* *size* 1. 4

1416 Tanagra; *obv.* Buckler; *rev.* TA., Half Horse to the right, with bridle, in an indented square; *extremely rare, old work, and very well preserved:*

size $4\frac{3}{4}$. *weight* $189\frac{1}{10}$ *grs.* 1

1417 Another; with TAN.; the horse has a wreath of laurel round the bottom of the neck; *very old work, and extremely good condition: size* $5\frac{1}{2}$. *weight* $185\frac{7}{10}$ *grs.* 1

*** Coins of this rare town become extremely rare with the additional letter N.

1418 Another; with TA., but the half horse in the indented square is to the left; and the buckler is ornamented with bars on the edge; *of extreme rarity, and in very good condition: size* $4\frac{3}{4}$. *weight* $188\frac{3}{10}$ *grs.* 1

*** It will be perceived that this, and most of the preceding coins of Bœotia, are adjusted to the talent of Ægina. This coin is a didrachm.

GOLD COINS OF THEBES.

1419 Thebes; *obv.* bearded Head of Bacchus, with a wreath of ivy, to the right; *rev.* ΘE. the infant Hercules seated, and looking to the left, strangling the serpents, in an indented square; *extremely fine old work, in fine condition, shewing the whole of both types, and so rare that only two or three are known to exist: size* 2. *wt.* 47 *grs.* 1

*** The style of work on this most rare and interesting coin, is referable to a period considerably anterior to Philip of Macedon. The position of the Infant Hercules differs from that on the silver coins. The gold is of pale colour. This is the identical coin published by Millingen, Greek Cities and Kings, 4to., London, 1831, page 58; see plate 4, fig. 11. It is a Hemidrachm of the Æginetan standard, which was in use in Bœotia in early times. It has lost, at least, a grain in weight, which would make it give a drachm of $95\frac{2}{10}$ grs.

1420 Thebes; *obv.* bearded Head of Bacchus, with a wreath of ivy, to the right; *rev.* ΘE., the infant Hercules turned to the right, strangling the serpents; *more recent work, but appears anterior to Philip; in a very perfect state of preservation, shewing both types; very fine work, and so rare as to be the second known to exist: the gold is of pale colour: size* $1\frac{1}{4}$. *weight* $15\frac{8}{10}$ *grs.* 1

*** The position of the Infant Hercules resembles Hunter, tab. 45, fig. 1, but the whole type is seen on this coin. If we might venture to give the same denominations to the gold sub-divisions of the Drachm, which the corresponding sub-divisions of the silver coins bear, this would be an obolus of the Æginetan standard, and gives a drachm of $94\frac{8}{10}$ grains.
